- Monthly Safety Training

"The benefits of our partnership with Clear Water has been immeasurable. Our small Town is the operator of a regional sewer plant that services, Pendleton, Clemson, and Anderson County. Finding qualified operators to manage the 3 million gallon plant with expertise in multiple aspects of operations has always been an issue. Clear Water brings not only their entire organization as a resource for my Council and management team, but they are genuinely concerned with the overall financial aspect encountered by everyone that runs a utility system. Additionally, with all the added support provided by Clear Water and their management team, it has allowed the Town to concentrate more on other issues we are encountering related to growth."

*Steve Miller, Town Administrator
TOWN OF PENDLETON, SC*

"Clearwater has worked to reduce our operational costs and improve our overall system operations. Both on-site and upper management personnel have proven to be readily accessible and effective additions to our municipal team. Their attention to detail and conscientious performance makes them a valuable part of our operations."

*R. Mack Durham, Former Mayor
CITY OF WILLIAMSTON, SC*
