NEWS RELEASE

Preservation Project Begins on Various County Roads

June 27, 2018

A pavement preservation project is scheduled to begin later today, weather permitting on approximately 20 miles of McLeod County roads. The project is a combination of seal coating and fog sealing. The project should take around 5 days. Scott Construction of Lake Delton, WI was awarded this year's seal coat project. Value of the work is approximately \$400,000.

The locations are shown on the attached map.

The roads will remain open. Flaggers will be present to help guide traffic; which should expect minor delays.

Seal coating is a preventative maintenance activity that involves applying liquid emulsified asphalt to a blacktop surfaced road and covering with aggregate. This process extends the life of the roadway and helps hold off costly reconstruction. Fog sealing involves spraying the road with a thin layer of liquid emulsion (oil).

Any questions regarding the project can be directed to our office.

Up to date project specific information will also be posted on our [Facebook](#) and [Twitter](#) pages; username is "McLeodCoHwy".
