

LICENSED CHILD CARE USE OF AN ALTERNATE DISINFECTANT

Provider Name: _____

MN Rule 9502.0435, Subp 13 D, requires that **bleach and water** be used when disinfecting the diaper changing area.

MN Statutes 245A.1446 Notwithstanding Minnesota Rules, part 9502.0435, a family child care provider may disinfect the diaper changing surface with chlorine bleach in a manner consistent with label directions for disinfection or with a surface disinfectant that meets the following criteria:

- (1) the manufacturer's label or instructions state that the product is registered with the United States Environmental Protection Agency;
- (2) the manufacturer's label or instructions state that the disinfectant is effective against *Staphylococcus aureus*, *Salmonella choleraesuis*, and *Pseudomonas aeruginosa*;
- (3) the manufacturer's label or instructions state that the disinfectant is effective with a ten minute or less contact time;
- (4) the disinfectant is clearly labeled by the manufacturer with directions for mixing and use;
- (5) the disinfectant is used only in accordance with the manufacturer's directions; and
- (6) the product does not include triclosan or derivatives of triclosan.

The product I would like to use is *(exact and full name on the label)*:

Manufacturer of the product: _____

	RULE REQUIREMENTS	Yes	No
1.	Does the product have an EPA registration number on the label? The products EPA reg. no. is:_____		
2.	Is the product effective against <i>Staphylococcus aureus</i> , <i>Salmonella choleraesuis</i> , <i>Pseudomonas aeruginosa</i> as listed on the label?		
3.	Does the product have a 10 minute or less contact time to kill the organisms it is effective against?		
4.	Are directions for mixing and use clearly described?		
5.	Does the product label state/show it is for home use?		
6.	Does the product include triclosan or any derivatives of triclosan?		

I understand that I am responsible to ensure the product is used according to manufacturer's directions.
