Manure Application Setbacks

Un-incorporated Manure Application Setbacks

- 300' from public or private drainage ditches (excluding road ditches)
- 300' from surface tile inlets
- 200' from new or existing single family residence
- 25' from public road right-of-way
- 300' from all rivers or streams, lakes, or DNR protected wetlands (listed on the DNR protected waters list) of types 3 through 8
- 500' from an area rezoned to a rural residential district, an existing church, school, park or city limits, licensed day care facility
- 50' from an active or inactive water supply well, sink hole mine, or quarry

Incorporated Manure Application Setbacks

- No application within 0' to 25' of a drainage ditch. At 25 to 300' of a drainage ditch incorporation must be within 24 hours.
- Incorporate within 24 hours in an area 300 feet from a surface tile inlet.
- 100' from any new or existing single-family residence
- No spreading within 25' from all rivers, streams, DNR protected wetlands or any lakes. Incorporate within 24 hours when applied at a distance between 25 and 300'.
- 100' from a residential development rezoned to a rural residential district, church, school, park, city limits, or licensed daycare facility.
