

Shard Villa Road Improvements

This project has two components: bank stabilization of the Middlebury River and road recycling & paving.

Engineering proposals were received from Dubois & King, Inc.(D&K), Green Mountain Engineering, Inc.(GME), and Pathways Consulting, LLC (PC). Proposals are attached.

Tally of Proposals

D&K	\$45,169
GME	\$30,700
PC	\$54,201

As part of the response to the request for proposal, the firms were requested to submit examples of previous similar (bank stabilization) projects and a brief discussion of their proposed solution for bank stabilization.

There is a wide cost spread between the three proposals and some of this is due to the estimated time the consultant anticipates the project will take. The proposals also have a variety of projects completed by the firms.
