Kathleen,

The attached photos show the deplorable condition of the walkway at the entrance to the Middlebury Rec Park. This walk which also serves Mary Hogan School has been underwater and impassable most of the winter, and is commonly flooded with each rain. This condition has persisted for at least the last twenty years with no Town interest or effort at improvement. Likewise, the gravel walkway to the Teen Center, Sports Center and Pool is a soupy, puddled mess much of the year, and also has received little or no attention for many years.

The Town needs to renew its commitment to its recreation programs and demonstrate that we take pride in the work of the Rec Department. Fixing these conditions and sprucing up the entrance would be a small, but important first step. Please share my thoughts with thw Board.

Thank you,

John
