

**Town of Middlebury
Emergency Management Bulletin
November 16, 2020**

Statewide Mass Feeding Plan:

The Farmers-to-Families food box program, run by the Vermont Foodbank, will be extended through December 31st. The USDA awarded Lancaster Foods, a Maryland company, the contract for Vermont, New Hampshire, and Maine. Vermont has been allocated 17,906 boxes of food for this round of distribution; each box will have 32 pounds of food. Distributions are anticipated to resume the week of November 16th. For information on distribution location, go to: <https://www.vtfoodbank.org/> Scroll down to “Upcoming Events”.

Updated Porter Hospital / Helen Porter Welcoming Policy (visitation)

Within the UVM Health Network, we recognize that family members and loved ones are valued members of the healthcare team and play a key role in supporting the wellbeing of our patients. As we seek to limit further the spread of COVID-19 during this new surge, our network is implementing temporary changes to our welcoming policy to protect the health and well-being of our patients and families, our staff, and our community. Therefore, **no visitors are permitted at this time until further notice.**

Limited exceptions are allowed (detailed in the following sections). In the case of these limited exceptions, everyone allowed to enter Network healthcare facilities:

- Must follow current state guidelines for quarantine. Those who have been in close contact with a person sick with COVID-19 must not visit our facilities.
- Will be screened for a fever and COVID-19 symptoms prior to entry. Those with symptoms compatible with COVID-19 will not be allowed to visit.
- Is required to wear a mask that covers the nose and mouth for the entire time they are in the building. Those not able or willing to wear a mask for the duration of their time in the building will not be permitted entry or allowed to remain within our facilities. Commercial masks with outflow vents, bandanas and neck gaiters are not permitted. A mask will be provided if you do not have an acceptable face covering.

Additionally,

- Only ADA service animals are permitted. All others animals, including previously approved therapy dogs/support animals, or service animals in training are not allowed at this time.
- In some circumstances, one “essential support person” may be permitted entry as a visitor, as in the case of a patient with communication needs (such as persons who are deaf or who do not understand/speak English), cognitive impairment, or a disability requiring assistance to access care. This quota does not include hospital-contracted interpreters, who are considered members of the care team.

Patient and Family Communication:

We will make every attempt to accommodate, for the patients and their families, the ability to talk or visualize, via the use of electronic devices, (patient or hospital owned) as necessary, so patients/families stay connected to their loved ones during this time of social distancing.

Inpatient/Acute Care and Emergency Department:**No visitors are permitted at this time until further notice, with some limited exceptions:**

- **Patients in End-of-Life Care:** Visitation for patients, for whom death in the hospital is imminent, will be managed by their care team. In general, one support person will be welcomed when a patient is nearing their end of life. No more than two family members at one time may be permitted in the patient room at the end of life.
 - Designated support persons must stay in the patient's room when possible. Exiting and re-entering is highly discouraged.
 - Support person designation cannot be transferred to anyone else.
 - **Clergy:** All denominations are supported by our Chaplain program.. In-person clergy visits may be pre-arranged with the hospital Chaplain or through our Palliative Care Service. They must log in with a screener as a visitor.
- **End-of-Life Planning:** Families members involved in end-of-life planning are to pre-schedule a meeting with the Palliative Care Team. If this meeting is in person, they must log in with a screener as a visitor.
- **Hospice Care:** Hospice nurses, chaplains and social workers are allowed to enter daily to visit their patients. All Hospice Care team members must log in with a screener as a visitor.
- **Labor and Delivery:** One designated support person is allowed on birthing units, extending through the post-partum stay on the mother-baby unit. This person is to remain with the patient on the unit and may stay the night. The designated support person must wear their mask whenever they leave the patient's room or when hospital staff enter the patient's room. Hospital contracted, certified doulas are permitted as an additional support person. If an infant is required to stay after the mother is discharged, visitation should follow the pediatric guideline.
- **Pediatrics:** Parents are not considered 'visitors' but are rather considered essential support persons. Two parents/guardians; only one is permitted at a time, and either one may accompany pediatric patients for their entire stay.
- **Inpatient Psychiatry:** No visitors until further notice.
- **Emergency Department:**
 - One parent/guardian at a time for pediatric patients.
 - One visitor for patients for whom a support person has been determined to be essential to the care of the patient (medically necessary).
 - Two designated support people for patients in end of life care.
 - All visitors must sign the Emergency Department visitor log book.

Process for Exceptions to Inpatient/Acute Care and Emergency Department Policies:

- Any additional exception to this policy can only be made by the physician and nurse leader of the unit impacted. If the care team cannot reach consensus with regard to limited exceptions, the Chief Medical Officer, or the AOC on evenings, nights and weekends, will be the final decision maker in all cases.
- For patients meeting an exception to the restriction on visitation, their identified support person should be documented in the patient's record. Units should identify patients who have a support person permitted (based upon one of the listed exceptions) and provide that information to the information desk at the start of each day.
- Support persons who meet these exceptions will be screened upon entrance to the building before being allowed to visit. Those with symptoms compatible with COVID-19 (fever, cough, difficulty breathing) or have an identified risk based on exposure will not be allowed to visit and can connect with the unit by phone to identify an alternate support person.
- All support persons allowed to visit are strongly encouraged to remain in the patient room during the duration of their visit, limit traffic in hallways and avoid congregating in waiting rooms, cafeterias and lobbies before, after or between visits. Family members/support persons are permitted to leave and re-enter the building but must be rescreened upon each entry. Family members are strongly encouraged to limit repeated entry and return.

Outpatient Clinics:

Family/friends are not permitted to accompany adult patients to outpatient visits:

Exceptions: There are limited exceptions for patients who require support and assistance to access their appointment as outlined below:

- **Pediatrics:** One parent or support person should accompany pediatric patients.
- **Limited Access to Care:** One support person is permitted in rare circumstances for a patient who requires assistance to access care (such as for a patient with a mobility or communication needs, for persons who are deaf or who do not understand/speak English, or have a disability or cognitive impairment). This applies to both outpatient clinic appointments, phlebotomy, and/or diagnostic imaging.
- **Distressing news and end-of-life planning:** One support person may be permitted to accompany a patient in anticipation of the following limited circumstances:
 - New diagnosis of a terminal illness
 - Patient's lack of response to treatment, which shifts the conversation towards end-of-life planning

- Change in the course of treatment that could have significantly negative outcomes, including end-of-life
- **Surgical Services:** One visitor/support person is permitted to escort an individual who is arriving for any procedure requiring sedation in the surgical or procedural waiting area.
 - For those patients being admitted to the hospital following a procedure, the support person can remain with the patient until they are called back to pre-op or the procedural holding area and then should exit the hospital. Updates will be provided via phone.
 - For ambulatory procedures, the support person may return when called in order to receive discharge instructions and help escort the patient out following discharge.
- **Fetal Ultrasound:** Obstetrics patients are permitted to bring one support person to their 20 week ultrasound appointment.
- **Diagnostic Imaging, Laboratory and Express Care:** One support person over the age of 16 is permitted to accompany patient to visits if the patient requires support or assistance to access their appointment. One parent/guardian may accompany pediatric patients.
- Patient who would benefit from other forms of support during a visit (such as having a family member 'present' to listen, participate in the discussion, etc.) are **encouraged to include support persons via telephone or video-conferencing technology.**

General Notes:

- All family members and support persons will be asked to clean their hands upon entry and exit from any unit, patient room, or clinic and upon entry and exit from the building.
- Security will be called to respond to any family members/visitors who present significant safety concerns, including unwillingness to mask or comply with social distancing requirements, or refusing to leave when asked on the basis of these concerns.
- Visitation rules apply equally to employees who wish to visit friends or family regardless of whether they are on or off duty.
- This policy will be modified on a case-by-case basis for unique circumstances.
- Vendors and partners in financial and professional service firms shall be restricted while the situation unfolds. If access is deemed medically essential (i.e. service repair) access must be restricted to only those required to address an essential service repair.

Helen Porter:

- With an increase in confirmed cases of COVID-19 in Vermont, Helen Porter is suspending all in-person visitation, effective Friday, November 13, 2020.
- We understand how difficult this decision is, but the safety of our residents, patients and staff is our priority.

- Helen Porter will continue to support window visits, telephone calls, and other electronic communication such as Zoom, FaceTime, or Skype. For assistance with technology and/or scheduling contact 802-385-3661.
- Compassionate care visitation, including end-of-life visitation, will be considered on a case-by-case basis.

COVID Compliance – Things to Keep in Mind

We are dealing with several reports concerning some businesses refusing to comply with the Governor's Orders on masking and other things. While the Governor encourages voluntary compliance and wishes to avoid referring violations to the Attorney General, there is always the regulatory issue. Yes, that means VOSHA/OSHA compliance, and if a liquor license is involved, the Department of Liquor Control will take interest.

State enforcement officers have begun making compliance visits and in Middlebury, local police officers will be doing the same. The intent is not to be heavy handed, the intent is to stop this burgeoning spread of virus. The choice is yours. Fortunately, Middlebury has generally been the gold standard in keeping the virus at bay.

122 new COVID cases in Vermont reported overnight, 21 people hospitalized. 265 new cases since Friday—it's widespread now, unlike earlier outbreaks and clusters confined to specific cloistered environments. The Central Vermont outbreak apparently opened Pandora's box along with Halloween fol d'rol. Just remember, it takes about a week or more to get symptoms and you're already "Typhoid Mary-ish" before you know you've contracted it, spreading it about unawares to all your contacts.
