**Registration for 75+ Not Ready Yet**

The registration portal and phone registration for vaccines for 75+, scheduled to commence January 27, is not up yet. VDH requests you don't call or try to schedule an appointment because the system is not yet operable. AHS and VDH plan to do a public release on Monday morning with all the details and registration and is expected to commence shortly after that.

**Vaccine Efficacy Information**

Below is a link to a fact sheet VDH has prepared to provide information on the Pfizer and Moderna vaccines. Pfizer is intended for those 16 and over, Moderna for those 18 and over. This fact sheet is simple and straightforward in a table format so you can easily locate the answers to many questions you may have on the vaccines.

VDH has also prepared a list of frequently asked questions as we get toward the age banding delivery of the vaccine. VDH is regularly adding to their FAQs as new information about COVID-19 vaccine and plans for vaccination in Vermont comes in. See also their Vaccine FAQs, which includes answers to questions including:

- I have allergies. Should I get vaccinated?
- Can my spouse or partner get a COVID-19 vaccine if they are younger than 75?
- Should I be vaccinated if I have or had COVID-19?

**Numbers**

After over a week of steadily declining numbers, a big bounce in VT COVID infections was reported today with 174 new infections reported, including 5 more in Addison County. Addison County now has 548 infections in the aggregate since March 13 and is currently one of the more COVID active areas in the state. Middlebury, once the gold standard for COVID-free towns now counts 93 infections since March, most of which were reported in the past 2 months.

A sobering thought as we enter the weekend.
