Subject: Correction for entry with last meeting notes

Kathleen,

I erroneously stated at the last meeting that the airport fuel tanks are above ground. I was remembering discussion I'd had quite some time ago with state staff that the state was moving to above ground tanks. In Middlebury's case, the existing below ground tank is scheduled for a full inspection. If/when the existing tank is deemed needing replacement, at that time the tank would move to above ground.

Can you please attach this or otherwise correct my misstatement in the minutes so the records are accurate.

Thanks,

Brian
