Subject: Vermont Gas Easement - ROW across Public Works lot 1020 Rte. 7 South

Hi Dan and Bill,

If you recall, a few months or so ago we had received a request for gas service from the Danyows who reside at 1036 Rte. 7 South. This will require an easement from the town of Middlebury for us to place a $\frac{3}{4}$ inch service line, substantially as depicted on the attached drawing. It's my understanding that this is the general location where they have a ROW to access the property. Once we dig-safe the area, if we have to tweak it based on other UG utilities, we can adjust accordingly.

Would you please review and let me know if this works for you. If so, I will send with the deed of easement to Kathleen to get on the SB agenda.

Please let me know if you have any questions.
Thank you,
Karen
