

STORMWATER MAINTENANCE SUPERVISOR

Position Code: 2749

WC Code: 6306

FLSA Status: Non-Exempt

Pay Grade: 356

Location: Public Services

Approval Date: 2022

General Statement of Duties

Performs supervisory, technical and skilled work directing the work of a unit engaged in construction, maintenance & repair of the public stormwater management system including inspection of facilities and coordination with the Stormwater Program Specialist on illicit discharge investigations within the Stormwater Section of Public Services.

Distinguishing Features of the Class

An employee in this class participates in planning, organizing, and supervising the operations of the Stormwater Section in the construction, maintenance, and repair of storm drainage infrastructure including inspection of facilities and assistance in illicit discharge investigations. An employee in this class also supervises crews engaged in a variety of work associated with storm drainage, street sweeping, and other maintenance activities. Work includes participating in planning section work activities, inspecting equipment for problems; ordering supplies and materials; leading a crew in maintenance or construction of storm sewer system. Employee confers with, advises, and gives directions to personnel in assessing work and resolving internal personnel or work problems. The employee determines the proper details and methods to be used in carrying out prescribed assignments and tasks. Work also involves insuring that crew members take proper tools, equipment and supplies to the work site and responsibility for work crews and their safety. The employee advises the Engineering Services Director on stormwater projects and ongoing activities and handles citizen inquiries and complaints. The employee is subject to working in inside and outside environments including extreme hot and cold weather, day or night, and exposure to various hazards including loud noises, vibrations, moving mechanical parts, exposure to chemicals, fumes, odors, poor ventilation, and oils. The employee is subject to Level III OSHA Standards on bloodborne pathogens. The employee must exercise judgment and initiative in carrying out assignments. Work is performed under general supervision and is inspected for compliance and instructions, conformance to established standards, quality and productivity of work crews, and adherence to schedules and priorities.

Duties and Responsibilities

Plans, organizes, and supervises the construction, maintenance and repair of storm drainage infrastructure and related facilities including facility inspection and assistance in illicit discharge investigation; assigns work to crews and crews projects; performs field inspection and directs field work on more difficult projects; organizes staff and equipment for most effective and efficient production.

Supervises and participates in the maintenance, repair and construction of storm drainage, and street sweeping; estimates amounts and orders materials and supplies for various jobs; recommends items for budget request; inspects existing storm drainage infrastructure and recommends priorities for capital improvement projects.

Inspects contracted work for the quality and adherence to plans and specifications.

Coordinates the use of available equipment, materials and staff to obtain maximum effectiveness and economy; responds to citizen requests and complaints.

Trains and instructs workers in the training, safety, and performance coaching of division employees; insures application of safety regulations.

Supervises personnel including participating in hiring; conducts training, performance coaching and evaluation, motivation and discipline of personnel.

Prepares division budget request including heavy equipment needs and costs; monitors adopted division budget; acquires material, supplies, and equipment in compliance with municipal purchasing practices.

Inspects storm drainage infrastructure and other work areas and gives technical advice and assistance to personnel.

Prepares time records; keeps records of material use and makes detailed reports.

Responds to, investigates, and resolves complaints from the public.

Completes work orders; insures that crews take necessary materials to work sites.

Participates in snow or ice removal.

Prepares and maintains a variety of records of section work activities.

Uses a variety of computer programs to complete work.

Performs related duties as assigned.

Recruitment and Selection Guidelines

Knowledge, Skills and Abilities

Thorough knowledge of the principles and practices of construction, repair, and maintenance of storm drainage, and street sweeping.

Considerable knowledge of Stormwater Control Measures (SCM's).

Considerable knowledge of the use of related equipment and materials.

Thorough knowledge of the occupational hazards related safety precautions.

Working knowledge of Illicit discharge investigation.

Working knowledge of related engineering specifications, and related environmental laws.

Working knowledge of budgeting and purchasing procedures.

Working knowledge of common computer programs.

Working knowledge of effective supervisory principles and practices and organizational personnel policies and procedures.

Working knowledge of surveying principles and practices.

Ability to assign and supervise the work of subordinates and to instruct them in proper work and safety methods and procedures.

Ability to read plans, maps, and drawings and to set grade and fall on projects.

Ability to establish and maintain effective working relationships with supervisors, peers, subordinates and citizens.

Ability to maintain and prepare accurate records.

Ability to use a variety of computer programs and office equipment.

Physical Requirements

Must be able to perform the basic life functions of climbing, balancing, stooping, kneeling, crouching, reaching, standing, walking, lifting, pushing, pulling, fingering, grasping, talking, and hearing.

Must be able to perform heavy work exerting up to 50 pounds of force occasionally, and/or up to 20 pounds of force frequently, and/or up to 10 pounds of force constantly to move objects.

Must possess visual acuity necessary to read maps and diagrams, to operate a vehicle and heavy construction equipment, and to read and prepare records.

Minimum Education and Experience

An Associate's Degree with course work in engineering technology, construction industry or related field and five to seven years of related supervisory experience; High School Diploma or GED and ten years of experience in supervision, street construction, maintenance, and repair, including heavy equipment operation; or an equivalent combination of education and experience.

Special Requirements

Possession of a valid Class B Commercial North Carolina Driver's License
