MSA Engineer's Report

To: Honorable Mayor and City Council Members
From: Jon Herdegen, P.E. – City Engineer
Project: Sanitary Sewer Lateral Lining Improvements – Public Outreach
Date: April 14, 2022 – For the April 21st Council Workshop

MSA has prepared the framework for a project website for the Sanitary Sewer Lateral Lining project. The intent of the website is to provide Newport residents, particularly those directly impacted by the project, a central hub for project information and general public engagement. MSA staff plans to review the website content and solicit feedback from Council and staff.

A link for the website is provided below and we invite the Council to browse the website in advance of the meeting. Please be aware that we will continue to refine the material presented prior to the meeting so the appearance and content may change slightly throughout the week. During the workshop, Claire Michelson and Emily Herold will walk through the website and receive your feedback. We look forward to the discussion and hearing your ideas.
