

Delaware Manufacturing Industries Company (DMIC)

Company History & Background

DMIC - Solutions Under Pressure

With headquarters near Niagara Falls, New York, DMIC is a USA designer, manufacturer, and supplier of high quality fluid handling components.

Ball valves, check valves, needle valves, flow controls, hydraulic fittings, port flanges, hot stabs, plugs, and actuators are among the many products stocked for quick delivery from locations in both the USA and Canada.

Delaware Manufacturing Industries Company (DMIC) was founded to design and manufacture precision fluid handling components and assemblies for aerospace and aviation applications. Over the years we have developed expertise and products for a much wider range of applications for companies all around the globe. DMIC is an ISO 9001 certified company.

Our goal is to ensure your success by providing support and products that meet your company goals for product performance, quality, budget, and on-time shipment. We proudly manufacture all our products in the USA.

DMIC is growing and looking for long-term employees to join our quality team. We have full and part time positions, 1st and 2nd shifts. We have put together a work environment that is a reflection of the quality of the products we produce.

DMIC offers excellent wages and benefits, including 401K match and 1-4 weeks' vacation based on years of service.
