Sent from my iPhone Hi Mark,

I am writing to find out why the planes have been so bad on

Friday and even worse today Monday . Have they started construction on the runway? The planes today started at about 830 am and have been basically non stop all day. The majority of the flights except for maybe 2 have been the flight schools. Some of the flight planes try to change their path so they don't keep flying over every 3 minutes, but some don't. It's 425pm now and for the last hour and a half two flight school planes have gone direct over my house at least 30 times or more. I can't count anymore. Are there no other runways open? I am hoping that today is not going to be the norm. Please advise and thanks you for working with our neighborhood.
