Hi Mr. Raymond,

I would like to report a low-flying airplane in the Sharon area today. I am not sure if it is one of your airplanes or not. It buzzed past my home (on Cottage St in Sharon) at 11:48am today. I passed low enough to cause some vibration to the windows in my home.

I am not sure what the aviation rules are on this but I do not think it appropriate to fly so low to my home. This is not the 1st time this has occurred. I have also experienced helicopters flying low by my home.

If required, I will also provide affidavits from other homeowners in this area as to the low flying aircraft.

Can you please look into why aircraft are flying so low to a residential area?

I would greatly appreciate it.

Kind regards,  
Celena R Smith
