Good Afternoon Mark,

There have been quite a few landings over our neighborhood today. It's excessive, given there is almost no wind today. Fortunately the planes have been landing quietly and not too low, except for one flight which was exceptionally low and loud. This happened about 3:30. I think the plane was a Pilatus single-engine large plane. The pilot flew just above my neighbor's treetops. Thank you for whatever you can do to help reduce overflights and noise. Happy Thanksgiving.
