Subject: Low flying planes creating loud noise over Norwood residences et

To: <airport@norwoodma.gov>

I live in Norwood at Summit Place and cannot spend any time outside on my patio because of almost constant airplane noise. The noise from planes flying overhead is very loud and planes seem to be flying very low. I have lived here 12 years and in past never had this problem. Low flying planes have been passing overhead every 3 minutes polluting air. I think from Runway 10. Flights should be directed toward route 95 until they reach enough altitude.
