Good evening, Mark:

I wanted to report that yesterday beginning at about 8:30 am through about 6:30 pm, a flight school or schools were overflying the above-referenced area. In the morning, the fly overs in this area averaged about every 3 minutes and in the late afternoon they were averaging every 1.5 minutes. I thought we had finally resolved this issue but it is quite apparent the flight school(s) has/have no regard for the noise abatement in its entirety and show absolutely no consideration to the people living in this area. I will also be filing a noise complaint directly with the FAA.

Thank you for your attention to this matter.

Best regards,

Kim Florek
