

Department of Public Works
Recycling Division
2025 Annual Report

The Recycling Center processed a total of 1,054 tons of material in 2025.

Much of your recycling efforts helped the Town avoid \$33,062.00 in disposal fees. Additionally, the Recycling Center generated \$59,183.43 in revenue from processed recyclable materials.

A detailed breakdown of processed materials, weights, and revenue is available on the Recycling page of the Town's website found at peterboroughnh.gov.

Additional Materials Accepted and Recycled

- 116 refrigerators
- 225 dehumidifiers and air conditioners
- 800 gallons of waste oil
- 4,172 feet of fluorescent light bulbs
- 758 screw-in light bulbs
- 10,822 lbs. of flat screen and CRT televisions

As of December 27, 2024, the Recycling Center began collecting Styrofoam. Through a collaborative effort between the Recycling Center staff and the Recycling Committee, all collected Styrofoam is transported to the Gilford, NH Transfer Station for processing and recycling.

More information about their recycling process can be found at:
<https://www.gilfordnh.gov/recycleright>

I would like to thank my coworkers Cameron Mandel, Jim Martin, and Eion Ward for their continued hard work and dedication.

I also extend my thanks to the Water Department and the General Services Department for their assistance with facility maintenance.

Finally, I would like to thank the Town Administration, the Selectmen, the Recycling Committee, and all the businesses and residents of Sharon and Peterborough for their ongoing commitment to reducing, reusing, and recycling.

Respectfully submitted,
Darren Dupuis-Smith
Recycling Manager
