Program Updates

Included inside:

- More dumpsters coming soon
- New: Recapture Bags offer a new option
- Dumpster relocations
- Service agreement renewals

Thank you for another great year!

The Revolution Plastics team would like to thank everyone for another successful year of cleaning up our farms and diverting millions of pounds of ag plastics from our landfills or being buried or burned on the farm. 2018 will be another year of growth for Revolution Plastics as we plan to bring on another 1,000 or more customers to the dumpster collection program and another 2,000 or more customers with our Recapture Bag program. With the dumpsters and the Recapture Bag program, we can now help farms of all sizes recycle their used Ag plastics. There is no longer any excuse to not be recycling!

More dumpsters to be distributed summer 2018

Farms interested in obtaining a dumpster to recycle their Ag plastics should make sure they are signed up for the program. Our customer service team is currently working to call and qualify all farms that have signed up for our program. Please make sure to return our call if you receive a message from the team as this will be the last summer we distribute dumpsters in this area and we will not be calling you again.

The successful launch of the Recapture Bag program

In November 2017, Revolution Plastics launched the Recapture Bag program. The bags have been a huge success with smaller farms, marinas, greenhouse operations, farms that use drip tape, and farms that have a little more plastic than their dumpster will hold from time to time. Learn more about the Recapture Bag program by calling 844-490-7873 or visiting Blue Lake Plastics, Jordan Ag, or KSI Supply. Revolution Plastics projects that the Recapture Bag program will help in keeping an additional 3 to 4 million pounds of Ag plastics out of landfills each year.

Service Agreement Renewal

Check your mailbox for the Revolution Plastics service agreement renewal for 2018. Please sign and return by June 1, 2018. The good news is the collection service is still absolutely FREE!

Win a \$250 Gift Certificate for packing your dumpster or bag correctly!

The key to a successful recycling program is really packing the plastic into those dumpsters. Revolution Plastics and many farms have tested and found that dumpsters can hold up to 1,400 lbs. of plastic without overflowing the dumpster and you can still shut the lid. We have a number of program participants that are only putting 500-700 lbs. of material in the dumpster. In order to help motivate farms to pack the material in the dumpsters we will be tracking dumpster weights. Any farm that averages more than 1,000 lbs. per pickup - and does not have the material contaminated with excessive dirt, feed, or banned products - will be put into a drawing for a \$250 gift certificate. We will draw a winner 4 times annually. The gift certificate can be redeemed at Blue Lake Plastics, Jordan Ag, or KSI Supply. The first drawing will be June 1, 2018. For dumpster packing tips we will be posting a video at revolutionplastics.com very soon.

Collection Schedule Enhancements

The new collection schedules are 4 week, 8 week, or call in when full. All customers have been moved to the schedule that best meets their needs based on the amount of plastic we have collected from your farm. We no longer have a 2-week or 16-week schedule. The best practice is to call us when your dumpster is full. Please keep in mind that a full dumpster is over 1,000 lbs. of plastic. If you have any questions please call us at 844-490-7873.

Contaminants – Don't Strike Out!

Please shake out the plastic before placing it in the dumpster or bag. We do not accept excessive dirt and feed, tires/sidewalls, net wrap, twine, buckets, pails, drums, scrim reinforced bunker cover, etc. Please refrain from placing these items in our dumpsters. Repeat offenders will be permanently removed from the program without further notice.

Dumpster Relocations

This spring and summer the Revolution Plastics team will be removing dumpsters from farms that don't need them any longer and placing them on farms that are qualified and would like to participate. If you have a dumpster and no longer need it, please call us 844-490-7873 so we can get that dumpster to a farm in need.

Stockpile Cleanup

I know some of you have become emotionally attached to the large pile of plastic you have had hidden behind the barn for the past 10 years but it's time to let it go. If you, or anyone you know, has a stockpile of plastic that needs to be cleaned up now is the time to schedule it. To schedule stockpile cleanups, call us at 844-490-7873 and ask for Price Murphy. We will work together to create a cleanup plan tailored to your needs.

On-Farm Silage Plastic Recycling

Call us to learn about our expanded coverage and pickup!

We can provide Recapture recycling bags or place and service a dumpster and provide free pickup of approved silage plastic.

Bale Wrap + Ag/Grain Bags + Bunker Cover + Drip Tape + Irrigation Tubing + Greenhouse Film + Boat Film
