Tammy,

As discussed on the radio issues project that we are working on to be added to the agenda for the next meeting. Attached is a quote received from RCC in Washington Missouri.

In this project we have had very bad not just cross department communication but also within our department. There have been a few cases recently one just last week where officers cannot communicate whatsoever with our current radio system. One of which was the Shooting that Patrolman Moore and Rictor were at. A subject shot themselves after making a claim he would shoot officers if they showed up to help him and they were on each end of the subjects house when the shot went off and were unable to reach each other or dispatch. Another was this past week where a male subject with warrants had assaulted a dent County Deputy by striking him with a board and fleeing the seen. Responding officers were left with just a guess of where to go to intercept the subject and pursuing officers to set up a perimeter. We have been lucky up to this point in no one has been severely hurt but its an issue that needs fixed ASAP.

When the new company started advising us on the best scenario they looked at our current set up and informed us of numerous problems causing interference that result in poor to no radio communications. In fact even when its working it still is very poor quality and could lead to issues of false information being sent from officers to dispatch. The Coax cable and current repeater and equipment that we are using are outdated pieced together items that were temporary band aids to the big problem. Over the past 3 years we have strategically bought radios where budget room allowed that were capable of switching to a more modern digital repeater with much better coverage and clarity. Otherwise this project would be triple what the cost is today.

Included in this project is a new Motorola repeater with new coax ran properly up the water tower. (The current one is hanging loosely which is putting a strain on the spliced connections that are another source of interference.) It includes a new dual station base radio set up that allows us to display officer identification when each officer keys up so dispatch will also be able to see who is talking if it's a heated situation and the person is possibly stumbling on the words. It gives us the opportunity to have the orange emergency button programmed so officers in trouble can simply hit the button and it alerts dispatch in bright red that an officer is in trouble and to get back up headed that way. It also addresses the security concerns of the current set up that has exposed coax that could render our communications useless with a cheap pair of bolt cutters.

Another advantage to this move is the current base radio we have could be left on dent county's channel so in multi-jurisdictional situations Dispatch will have contact with us and the officers operating on Dent County's MOSWIN channel.

This also will be purchasing a Harris Portable for when dispatch needs to leave the room to be able to hear officers anywhere in the building. Which is highlighted on the SPD XL Radio Pricing PDF.

The total cost of this project and request is **\$41,339.91**

Thanks for your consideration.
