SEWER BACKWATER VALVE PROTECTION DETERMINATION

Job Address: _____

Section 710.1 of the Los Angeles County Plumbing Code requires that drainage piping serving Plumbing fixtures installed on a floor level that is below the elevation of the next upstream manhole cover of the public or private main sewer serving such drainage piping shall be protected from backflow of sewage by installing an approved type **backwater valve**.

It is the responsibility of the permittee to determine whether the relative elevations of the plumbing fixtures and sewer manhole cover at this job site are such that a **backwater valve** is required.

I, _____, (print) the LICENSED CONTRACTOR / OWNER (circle one) have reviewed the conditions at the job site and have determined that:

- A **backwater valve** is required and is installed.
- No **backwater valve** is required. Plumbing fixtures installed on a floor level that is below the elevation the next upstream manhole cover.
