EXECUTIVE SUMMARY

Weston & Sampson Engineers, Inc. (Weston & Sampson) was retained by the Town of Stafford (Town) to perform a Phase I Environmental Site Assessment (ESA) on a parcel of land located at 21 Furnace Avenue in Stafford Springs, Connecticut. The ESA was performed in accordance with ASTM Standard Practice E1527-13, the United States Environmental Protection Agency (EPA) All Appropriate Inquiry (AAI) standard, and the Connecticut Department of Energy and Environmental Protection (CT DEEP) Site Characterization Guidance Document (SCGD) (issued September 2007, revised December 2010). The Town is looking to facilitate redevelopment of the Site by a third party. This ESA was funded through a 2019 EPA Brownfields Assessment Grant (No. BF-00A0036).

The 0.93-acre Site is located on the eastern side of Furnace Avenue in a commercial zone of Stafford Springs. The property is owned by American Woolen Company, Inc. (American Woolen) and is improved with a two-story, slab-on-grade brick warehouse building and asphalt paved parking areas. The Site is currently used by American Woolen for storage of various textile machinery and equipment. The Site building is not heated and is not connected to the municipal sewer or water systems. It does not have a septic system. The building's sprinkler system is provided with water from a well located on-Site.

An Environmental Data Resources, Inc. environmental database report identified the Site as being listed on the Connecticut Brownfields Inventory database. The adjoining property west and potentially upgradient of the Site, 8 Furnace Avenue, is the main operations building for American Woolen. It was identified on the CT DEEP Voluntary Remediation Program and state spill databases. Records obtained at the CT DEEP public file room for 8 Furnace Avenue document waste manifests for waste streams including corrosives and petroleum, several spill incident reports, and documentation related to the release of fuel oil from a boiler room leaking tank.

Weston & Sampson conducted Site reconnaissance visits on October 28, 2020 and December 15, 2020. Various textile machinery and equipment were observed throughout both the main and second story levels of the building. Staining on the concrete floor of the main level was observed beneath and around some of the machinery/equipment. Drum storage was observed on the second story of the building, however, the drums appeared to be empty and in good condition. Evidence of a release such as staining on the outside of the drums or floor surface beneath or around the drums was not observed. Leaking containers of roofing tar were observed in the western half of the second story of the building. The roofing tar had seeped through the first story ceiling and along the interior walls and pooled in some areas of the main level. The building's concrete floors were in fair to poor condition, with areas of cracking and pitting. No floor drains were observed inside the building.

Weston & Sampson identified the presence or likely presence of hazardous substances or petroleum in, on, or at the Site that are attributable to the following Recognized Environmental Conditions (RECs):

- Current use of the Site as a storage warehouse by American Woolen and unknown storage history. Four Areas of Concern (AOCs) have been identified under this REC; and
- The presence of documented conditions on the upgradient industrial property to the west occupied by American Woolen's main operations building (8 Furnace Avenue) is considered a REC and AOC and contribute to Weston & Sampson's moderate VEC conclusion for the Site.

Phase I FSA

Based upon information compiled by this Phase I ESA, the Site does not appear to meet the definition of an "Establishment" as defined by the Connecticut Transfer Act (Connecticut General Statutes Sections 22a-134 through 22a-134e).

Given the findings, opinions, and conclusions discussed herein, Weston & Sampson recommends that a Phase II ESA be completed to address the RECs identified above and to more fully characterize the Site for future redevelopment. Based upon age of construction or observations made during Site Reconnaissance, we recommend hazardous building materials (HBM) also be assessed as part of Phase II ESA activities to support reuse and redevelopment of the Site.

1.0 INTRODUCTION

Weston & Sampson Engineers, Inc. (Weston & Sampson), on behalf of the Town of Stafford (Town) has prepared a Phase I Environmental Site Assessment (ESA) of the property located at 21 Furnace Avenue in Stafford Springs, Connecticut (Figure 1). The Site is owned by American Woolen Company, Inc. and is located within a commercial business development area. The Town is looking to facilitate the redevelopment of the Site by a third party. This ESA was funded through a 2019 EPA Brownfield Assessment Grant (No. BF-00A0036).

The ESA was performed in accordance with ASTM Standard Practice E1527-13, and the United States Environmental Protection Agency (EPA) All Appropriate Inquiry (AAI) standard. The ESA was also conducted in accordance with the Connecticut Department of Energy and Environmental Protection (CT DEEP) Site Characterization Guidance Document (SCGD) issued in September 2007 and revised December 2010. The ESA included environmental database searches; review of local, state, and federal regulatory agency records; and a reconnaissance of the Site and vicinity. This report is subject to the Limitations described in Section 1.6.

1.1 Site Ownership and Location

21 Furnace Avenue – Stafford Springs, Connecticut

Latitude/Longitude: 41° 57' 18.95" North

72° 18' 7.04" West

UTM Coordinates: Zone 18

723,617.0 meters Easting 4,648,117.0 meters Northing

Elevation: 512 feet above sea level

Site Owner: American Woolen Company, Inc.
Site Occupants: American Woolen Company, Inc.

Site Location: 21 Furnace Avenue – Stafford Springs, Connecticut

County: Tolland

Parcel ID: Map 51, Lot 116
Size: 0.930-total acres

The Site consists of a single, 0.930-acre parcel of land located on the east side of Furnace Avenue near the downtown area of the Town of Stafford known as Stafford Springs, Connecticut. Access to the Site is via two curb cuts off Furnace Avenue.

A Locus Map and a Site plan detailing current Site conditions are provided as Figures 1 and 2.

1.2 Purpose

The Phase I ESA was performed to assess the Site to evaluate the potential presence of hazardous substances, including those within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products.

The objective of the Phase I ESA is to identify Recognized Environmental Conditions (RECs) and/or Areas of Concern (AOCs) in connection with the Site at the time of the Site evaluation. The term "Recognized Environmental Condition" referenced in ASTM E1527-13 refers to "the presence or likely presence of any hazardous substance or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." An AOC is defined in the SCGD as "locations or areas at a site where hazardous waste and or hazardous substances (including petroleum products) have been or may have been used, stored, treated, handled, disposed, spilled, and/or released to the environment."

The ASTM definition does not include "de minimis" conditions, which generally do not present a threat to human health or the environment and would not be the subject of an enforcement action if brought to the attention of the appropriate governmental agencies. Therefore, de minimis conditions are not considered RECs.

The term "Historic Recognized Environmental Condition" (HREC) referenced in ASTM E1527-13 refers to "a past release of any hazardous substances or petroleum that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority without subjecting the property to any required controls."

1.3 Scope of Services

This ESA was conducted utilizing a standard of good commercial and customary practice that is consistent with ASTM E1527-13 and the SCGD. Any significant scope-of-work additions, deletions, or deviations to ASTM E1527-13 and the SCGD are noted below or in the corresponding sections of this report.

1.4 Non – ASTM Scope Considerations

The scope of work completed for this assessment did not include any non-ASTM scope considerations. Specifically, the evaluation of asbestos containing materials (ACM), lead-based paint, polychlorinated biphenyls (PCBs) in building materials, radon, and testing for contaminants in soil, groundwater, surface water, sediment and indoor air were excluded.

1.5 User Reliance

This report may be distributed and relied upon by the Town of Stafford Springs and their successors and assigns. Reliance on the information and conclusions in this report by any other person or entity is not authorized without the written consent of the Town of Stafford Springs and Weston & Sampson Engineers, Inc.

Phase I FSA

1.6 Deviations

Except for the limitations and exceptions discussed in Section 1.7, this Phase I ESA complies with ASTM Standard E1527-13 and the SCGD.

1.7 Limitations

This report was prepared exclusively for the Town of Stafford Springs. Information provided by Weston & Sampson in this report is based solely on the information reported in this document. Future investigations and/or information that was not available to Weston & Sampson at the time of the investigation may result in a modification of the findings stated in this report.

If additional information becomes available concerning this Site (or neighboring properties that could directly impact the Site in the future) this information should be made available to Weston & Sampson for review so that, if necessary, conclusions presented in this report may be modified. The conclusions of this report are based on conditions observed at the Site by Weston & Sampson personnel at the time of the investigation, information provided in the environmental database report and the Town of Stafford Springs, and information provided by Federal, state, and local agencies. This report has been prepared in accordance with generally accepted engineering and geological practices. No other warranty, express or implied, is made.

1.8 User Provided Information

A User Questionnaire was provided to Ms. Amber Wakley, Grants & Marketing Specialist for the Town of Stafford Springs. The information requested in the User Questionnaire is intended to assist in gathering evidence to identify RECs at the Site. A copy of the User Questionnaire, as completed by Ms. Wakley, is included as **Appendix A**. A general environmental questionnaire, completed by the Chief Executive Officer of American Woolen Company, Mr. Jacob Harrison Long, and Weston & Sampson personnel, is also included in **Appendix A**. A summary of the information gathered from the completed User Questionnaire is provided below.

1.8.1 User Provided Records/Documents

The User did not possess any previous environmental reports for the Site.

1.8.2 Environmental Liens

The User reported that there were no environmental liens against the Site that are filed or recorded under Federal, tribal, state, or local law. Additionally, an environmental lien report did not identify any Environmental Liens on the Site. A copy of the lien report is included as **Appendix C**.

1.8.3 Activity and Use Limitations

According to the User, the search of the land title records did not identify any Activity and Use Limitations (AULs). Additionally, an AUL search performed by Environmental Data Resources, Inc. (EDR) did not identify any AULs for the Site. A copy of the AUL report is included as **Appendix** C

1.8.4 Specialized Knowledge

The User reported they have no specialized knowledge or experience that is related to the Site or nearby properties.

1.8.5 Valuation Reduction for Environmental Issues

The User does not know if the purchase price being paid for the property reasonably reflects the fair market value of the property.

1.8.6 Commonly Known or Reasonable Ascertainable Information

The User does not know of any commonly known or reasonably ascertainable information about the Site that would be indicative of any releases or threatened releases of petroleum products or hazardous substances that is not already documented in previous reports.

1.8.7 Degree of Obviousness of Contamination

The User does not know of any obvious indicators that point to the presence or likely presence of hazardous substances or petroleum products at the Site.

1.8.8 Reason for Performing Phase I ESA

The User indicated that the Phase I ESA is being performed as part of the Stafford Springs Brownfield Initiative.

2.0 DATA SOURCES

2.1 Electronic Database Search

A review of "standard" environmental databases (as specified by ASTM Standard E1527-13) and maintained by federal, state, and tribal offices was completed by Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E1527-13. The databases use geocoded information to identify the coordinates of the properties or to check the street addresses of practically reviewable non-geocoded "orphan" properties located within the same zip code. The detailed database report, including mapping of results and limitations of the search criteria, are contained in **Appendix C**. Database acronyms that are not explicitly defined in this discussion are also included. The EDR report identifies the name of all databases that were searched, the date information was last updated by EDR, and the date information was last updated by the original source.

It should be noted that plotted locations of listed sites are not always accurate. Regarding listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, Weston & Sampson uses the best available data when evaluating the location of listed orphan sites.

The table presented in Section 2.2 summarizes if the Site is listed in the databases reviewed. A detailed evaluation of the database information and results of the Site-specific regulatory file review(s) is included in Section 3.3 of this report.

The table presented in Section 2.2 also summarizes the number of off-site properties reported for each database. Each of the property records identified in the databases were reviewed to determine the potential to impact the Site. In general, releases with sources that are proximal to and hydraulically upgradient of the Site, have the greatest potential to impact the Site. Weston & Sampson reviewed the location of each property and potential contaminant in the database report. For the purpose of this Phase I ESA, if the database listing location meets one or more of the following conditions:

- hydrogeologically isolated from the Site (e.g. across a river),
- at such distance from the Site that migration of contaminants to the property is unlikely, or
- groundwater flow from the listed property is away from the Site,

it will be excluded from further consideration because any releases of hazardous substances or petroleum are not likely to impact the Site. In addition, the magnitude of the release, contaminant type, and current regulatory status of the off-site source is also considered.

The table presented in Section 2.2 summarizes the number of database properties/records which have been deemed unlikely to impact the Site for the reasons noted above. The remaining properties were evaluated in more detail to determine if they pose a threat to the Site. A detailed evaluation of the database results, regulatory file reviews (if performed) and the potential impact of these properties to the Site is included in Section 4.3 of this report.

2.2 Federal and State Records – EDR Standard Environmental Records Database

The table below summarizes the databases searched by EDR. A copy of the EDR report is included in **Appendix C**. The Site was identified on the Brownfields database searched by EDR. Specific off-site properties identified within the database report are further evaluated in the table below:

SUMMARY OF EDR'S FEDERAL/STATE REGULATORY DATABASE SEARCH FINDINGS						
Regulatory Database		Off-Site listings				Off-Site listings
(Approximate Minimum Search Distance)	Site Listed	Within Search Distance	Hydrogeologic Isolation	Distance	Down gradient	requiring additional review
NPL/delisted NPL (1.0 mile)	No	0	0	0	0	0
SEMS/SEMS NFRAP (0.5 mile)	No	0	0	0	0	0
RCRA CORRACTS (1.0 mile)	No	0	0	0	0	0
RCRA TSD (0.5 mile)	No	0	0	0	0	0
Federal RCRA Generator Sites (property & adjoining)	No	0	0	0	0	0
Engineering & Institutional Control Registries (property & adjoining)	No	0	0	0	0	0
Federal ERNS list (property)	No					
State Hazardous Waste Sites/ Equivalent NPL/ CERCLIS Sites (0.5 mile)	No	0	0	0	0	0
State Landfill & Solid Waste Disposal Sites (0.5 mile)	No	0	0	0	0	0
State Leaking Storage Tank Sites (0.5 mile)	No	7	3	1	2	1
State Registered Storage Tank Sites (property & adjoining)	No	8	0	1	6	1
State Engineering & Institutional Control Registries (property & adjoining)	No	0	0	0	0	0
State Voluntary Cleanup Sites (0.5 mile)	No	2	0	0	0	2
State Brownfields Sites (0.5 mile)	Yes	2	1	0	1	0
State Spills (property)	No					
CT Property Transfer (property)	No					

2.3 State Records - CT DEEP

Based on the Brownfield listing for the Site and two off-Site adjoining properties with various listings on the environmental database report, Weston & Sampson submitted a Freedom of Information Act (FOIA) to the CT DEEP on October 23, 2020 to review any files associated with these properties. Weston &

Sampson conducted the CT DEEP file review on November 18, 2020. Copies of pertinent State Records are included in **Appendix D**.

The CT DEEP public file room did not possess any information for the 21 Furnace Avenue (Site) or 29 Furnace Avenue (northern abutter) addresses.

The CT DEEP public file room contained the following information for the 8 Furnace Avenue (western abutter) address:

- Waste manifests from September 1996 through March 2018.
- Leaking Underground Storage Tank (LUST) and associated spill reports dated June 1989.
- Several spill reports dated between 1987 and 2012.

The documents located at CT DEEP for 8 Furnace Avenue are described in more detail in Section 4.2

2.4 Orphan Sites

The EDR database report identified two orphan site listings. Orphan sites are those that could not be accurately mapped or geocoded due to inadequate location information. Orphan listings provided by EDR were cross referenced with state and local files to confirm addressing. Weston & Sampson attempted to locate orphan sites via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, Weston & Sampson did not identify any of the listed orphan sites as being likely to adversely impact environmental conditions at the Site.

2.5 Historic Records Review

The objective of consulting historical sources is to develop a history of the previous uses of the property to help identify the likelihood of past uses which may have led to RECs in connection with the Site. Historical use information was obtained from a variety of sources, as summarized below:

SUMMARY OF HISTORICAL RECORDS SOURCES REVIEWED		
Source	LOCATION	
Sanborn® Fire Insurance Maps	Appendix E	
Historic Topographic Maps	Appendix F	
Historic Aerial Photographs	Appendix G	
City Directories	Appendix H	
Other Historical Sources (Municipal Records)	Appendix I	

2.6 Physical Site Setting

This section presents a description of the sources reviewed during the development of the environmental setting pertaining to the Site, and regional features including topography, groundwater, and geology. The table below summarizes the physical setting sources included in this report:

SUMMARY OF PHYSICAL SITE SETTING SOURCES		
Source	LOCATION	
United States Geological Survey (USGS) Quadrangle topographic maps	Appendix F	
Bedrock Geology Map	Section 3.1	
Surficial Geology Map	Section 3.1	
Groundwater Classification Map	Section 3.1	

2.7 Interviews

The purpose of the interview is to obtain information identifying possible RECs in connection with the Site. A concerted effort was made to interview those knowledgeable about the Site. Weston & Sampson conducted research and interviews with the report user, the Site owner, and specific municipal officials that may have insight on the potential use, storage, or release of hazardous substances or underground storage tanks (USTs) at the Site or adjoining properties. A summary of interview sources and location of the documentation of the interview and questionnaire results is included below:

SUMMARY OF INTERVIEW SOURCES		
Source / Interviewee	LOCATION	
Report User / Town of Stafford Springs – Ms. Amber Wakley	Appendix J	
SUMMARY OF INTERVIEW SOURCES		
Source / Interviewee	Source / Interviewee	
Current Site Owner / American Woolen Company – Mr. Jacob Harrison Long	Appendix J	
Past Owner	N/A	

2.8 Site Reconnaissance

On October 28, 2020, Ms. Meghan Shanahan of Weston & Sampson performed a visual reconnaissance of the Site by walking the accessible areas of the property and by viewing the parcel from surrounding

Phase I ESA

properties. A follow-up visual reconnaissance was performed on December 15, 2020 by Ms. Shanahan and Ms. Laura Yellen of Weston & Sampson. The purpose of the Site reconnaissance visits were to observe current conditions and assess, based on visual observations, if there was evidence of RECs (i.e., release(s) of oil and/or hazardous substances (OHM) to the surface or subsurface) at the Site or its surrounding areas. A log of photographs taken from each reconnaissance is included in **Appendix K**.

2.9 Qualifications of Environmental Professional Staff

Ms. Meghan Shanahan performed the Site reconnaissance, collected data and prepared the report. Ms. Shanahan has over 4 years of environmental assessment and remediation experience.

Ms. Laura Yellen coordinated, supervised, and performed the Site reconnaissance, collected data, and reviewed the report. Ms. Yellen has over 15 years of environmental assessment and remediation experience and qualifies as an Environmental Professional.

Mr. Paul Boison provided a technical review. Mr. Boison qualifies as an environmental professional and is a Licensed Environmental Professional (LEP) in Connecticut with over 30 years of environmental experience conducting ESAs and remedial actions.

A copy of the professional resumes for each staff member listed above is included in Appendix L.

2.10 References

A list of documents referenced in the development of this report is included in **Appendix M**.

3.0 SITE CONDITIONS AND USE HISTORY

This section presents a descriptive summary of the use, history, and environmental setting pertaining to the Site, regional features including topography, groundwater, geology, and field observations based upon the information gathered from the data sources listed in Section 2.

3.1 Current Conditions and Use of the Site

General Site Description

The 0.930-acre Site consists of a single parcel of land located on the east side of Furnace Avenue in a commercial business zone of Stafford Springs, Connecticut. The Site is owned by the American Woolen Company, Inc. and contains an approximately 17,000 square-foot, slab-on-grade, two-story brick warehouse building situated near the northwest portion of the Site parcel. Concrete platforms leading to large double doors are located at the northwest corner of the building fronting Furnace Avenue and on the south side of the building. The remainder of the parcel consists of an asphalt paved parking lot east and south of the building. Access to the Site is via two curb cuts off Furnace Avenue. Stormwater runoff is collected within catch basins located throughout the Site and along Furnace Avenue. The Site building is not currently heated and is not connected to municipal water or sewer service. There is no Site septic system.

Physical Setting

Based on a CT DEEP Water Quality Classifications map, the Site is located in a GB groundwater area, which indicates that groundwater is not suitable for human consumption without treatment. Local groundwater flow direction was inferred from a review of the USGS topographic map and observations during the Site visit. It is anticipated that groundwater at the Site likely flows to the east-southeast towards Furnace Brook.

The Site and surrounding area are generally flat at an approximate elevation of 512 feet above sea level. According to the "Surficial Materials Map of Connecticut" (Stone, et al., 1992), the Site is underlain by a mixture of sand and gravel layers. Information documenting the bedrock geology of the Site was obtained from the "Bedrock Geological Map of Connecticut," (Rodgers, 1985). The Site is located within the Mount Pisgah Member or Littleton Formation, a gray, medium-grained, micaceous quartzite or schist. Bedrock outcrops were not observed during the Site reconnaissance.

Observations

The Site currently contains a warehouse building used primarily for the storage of various remnant American Woolen Mill equipment/machinery. According to Mr. Long, American Woolen never conducted operations on Site. The types of equipment observed on the main level included former textile machines, racks of rods, two large circular wooden barrels, an old suspected battery, and other unidentified pieces of equipment. Staining was observed on parts of the machinery/equipment and on the concrete floor beneath and around several of these pieces of equipment. Dark, black drip stains were observed on the west and interior west side walls. Also in the vicinity of these wall stains were pools of the same dark substance on the concrete floor, which appeared to be leaking through the floor of the second level. Overall, the concrete floor on the main level appeared to be in poor condition with several areas of cracking and pitting. No floor drains were observed.

The southeast corner of the main level is also used as storage of remnant farmers market items when the Town utilized the Site for their Farmers Market for a single season. These items include several cardboard boxes, hay, and signs. Two white plastic 55-gallons drums were also observed in this area. The drums included a deteriorated label, with a readable portion indicating "DEF" - diesel exhaust fluid. However, the drums appeared to be used as trash barrels and did not contain any liquid. Evidence of release from these drums such as staining on the concrete floor beneath them was not observed.

Additional storage was observed primarily on the western side of the second story of the building. The stored materials included additional rollers, pumps, miscellaneous metal, a large circular white tank (size unknown), a wooden palette containing bags of "oil zorb" absorbent product, two unidentified yellow containers, a 5-gallon plastic gasoline container, seven 55-gallon plastic drums, and several approximate 5-gallon plastic or metal containers of roofing tar. The purpose of the large, white tank is unknown. The tank did not contain a cover and appeared to be empty. Likely absorbent material was observed around the base of the tank, however, it did not appear discolored and no odors were observed. The purpose of the two yellow containers stored near the northwest corner of the second story of the building is also unknown, however these containers could not be observed up close due to the questionable structural integrity of the second level of this portion of the building (a large section of the second floor has collapsed on the west side of the central interior wall).

The plastic gasoline container appeared to be approximately 2/3 full and evidence of a release such as staining on the outside of the container or flooring was not observed. Only one of the seven 55-gallon drums possessed a label. The label indicated that the product that was in the drum was "Reducene" from Colonial Color, Ltd. The drums were located on the west side of the central interior wall and appeared to be in good condition, did not possess covers and were all empty. According to Mr. Long, the drums previously stored detergents and soaps. Evidence of a release from these drums such as staining on the exterior of the drums or flooring beneath and around the drums was not observed. A single container of roofing tar was observed adjacent to the drums on the west side of the central interior wall. The container appeared to be leaking and an area of heavy staining was observed on the floor surface around the container. This release also resulted in this material seeping through the second level floor to the concrete floor below on the main level and along the west side of the interior wall. This correlates to the dark substance previously observed on the main level. A similar scenario was observed along the western wall of the second level. Up to 15 containers of roofing tar are stored in this area and a release from one of the containers was observed. This release also resulted in seepage along the interior west wall of the building and downward to the main level.

Peeling paint was observed on both interior and exterior painted surfaces. Evidence of a release to the Site exterior such as staining on the asphalt surface or distressed vegetation in the landscaped areas was not observed. Evidence of USTs (such as fill or vent pipes) was not observed. No groundwater monitoring wells were observed on Site. A well was observed south of the building that provides water for the sprinkler system and is adjacent to the location of the sprinkler room just inside the southern wall of the building.

3.2 Past Use History

Based on information gathered from the review of historical data sources, municipal records, and interview information referenced in Section 2 of this report, the Site was historically developed with a single, rectangular-shaped building situated at the northwest area of the Site. Based on an 1884

Sanborn® map this building was occupied by a blacksmith. The 1884 map also depicts a west to east trending raceway along the northern portion of the Site originating from the Furnace Brook impoundment to the north and discharging to the adjacent Furnace Brook to the east. The raceway appears to have been filled in sometime prior to 1897 and additional small shed-like buildings (one labeled as "wood sawing") are first depicted at the southeast portion of the Site on the 1911 Sanborn® map. By 1930, all of the on-Site structures had been razed and the western portion of the current building was present. Based on the 1930 Sanborn® map, the new Site building is labeled as a "Store House." Aerial photographs and Sanborn® maps show that an addition was added onto the east of the building sometime between 1943 and 1952. Prior to American Woolen Company, Inc., the Warren Corporation (a fabric mill) owned the property. In 2014, American Woolen purchased the Site from the Warren Corporation and utilized the building for storage of various mill equipment. The exact uses of the Site building prior to the occupancy of the current owner are unknown.

The City of Stafford Springs Assessor, Building, Planning and Zoning, Fire Marshal, and Health Department did not possess any pertinent environmental information for the Site.

3.3 Database Listing Discussion

The current Site address of 21 Furnace Avenue was identified on the CT Brownfields database searched by EDR. It was listed with the ACRES property ID 242614. No additional information on the Site was provided by the EDR Database Report.

3.4 Connecticut Transfer Act

The Connecticut Transfer Act (C.G.S. Section 22a-134 *et seq.*, as amended) requires the disclosure, investigation, and possible remediation of environmental conditions when certain real properties and/or businesses ("Establishments") are transferred. An "Establishment" is defined as any real property at which or any business operation from which (A) on or after November 19, 1980, there was generated, except as the result of (i) remediation of polluted soil, groundwater or sediment, or (ii) the removal or abatement of building materials, more than one hundred kilograms of hazardous waste in any one month, (B) hazardous waste generated at a different location was recycled, reclaimed, reused, stored, handled, treated, transported or disposed of, (C) the process of dry cleaning was conducted on or after May 1, 1967, (D) furniture stripping was conducted on or after May 1, 1967, or (E) a vehicle body repair facility was located on or after May 1, 1967.

No manifests documenting disposal of or acceptance of hazardous waste were identified for the Site during this Phase I ESA. In addition, no documentation was identified that would suggest the Site operated as a drycleaner, furniture stripper or auto body repair facility on or since May 1, 1967. Based on the findings of the Phase I and the criteria listed in the Transfer Act statute, the Site does not appear to meet the definition of an "Establishment". This opinion should be confirmed by legal counsel prior to any qualifying transfer of ownership of the property or business.

3.5 Polyfluoroalkyl Substances (PFAS)

The Site's current occupant, American Woolen Corporation, has never used or manufactured PFAS-containing substances. Potential uses of PFAS-containing materials by the prior owner, Warren Corporation, is unknown.

4.0 OFF-SITE PROPERTY CONDITIONS AND USE HISTORY

This section presents a descriptive summary of the use, history, and environmental setting pertaining to off-site properties, regional features including topography, groundwater, and geology, and field observations based upon the information gathered from the data sources listed in Section 2.

4.1 Current Use of Adjoining Properties

Surrounding the Site are a mixture of residential, commercial, and industrial buildings and waterways including:

North: Grassy area followed by a reservoir.

East: Furnace Brook followed by a wooded area and residential homes.

South: 17 Furnace Ave (appears to be a working shop) followed by the Stafford Springs post office. **West**: Furnace Avenue followed by residential homes (northwest) and American Woolen Company, Inc. located at 8 Furnace Avenue (southwest).

In general, no adverse environmental observations, visual evidence of petroleum products or hazardous substances, were identified on the adjoining properties to the north, east, south or west.

4.2 Past Use History

Based on information gathered from the review of historical data sources and results from interviews referenced in Section 2 of this report, the off-site properties historically consisted of a mix of residential, commercial, and industrial properties. The 1884 Sanborn® map depicts a large mill complex occupied by Granite Mills Company (a cotton mill) to the west-southwest, dwellings to the northwest, and various commercial buildings to the south. Another large mill complex (Warren Woolen Company) is depicted north of the Site on the 1884 Sanborn® map (current address of 29 Furnace Avenue). Also, north of the Site and adjacent to the Warren Mill is an impoundment of Furnace Brook (the same impoundment currently present north of the Site). Surrounding property use remained unchanged into the late 1800s. The mill located to the west-southwest changed names from the Granite Mills Company to Central Woolen Company, and then to Cyril Johnson Woolen Company. The property was later acquired by the Warren Corporation and is currently occupied by American Woolen Company (8 Furnace Avenue) where main production and operations occur.

The late 1800s and early 1900s Sanborn® maps depict properties to the south occupied by a livery, monument works, printing shop, a plumbing and tin shop, automotive sales and service shop, and various livery and wagon sheds. According to Mr. Long, the Site was historically used as a trolley depot, however, according to the Town and historic Sanborn® maps, it is more likely the southern abutting property was historically used as a bus and/or trolley depot. The 1930 Sanborn® map depicts a large, linear structure for bus storage which replaced the various small commercial shops in this area. Sanborn® maps from 1921, 1930, 1943 and 1960 also depict a buried gasoline tank associated with the properties to the south. More currently, based on city directories, the property directly to the south of the Site is occupied by American Medical Response. Prior to that time, the property was the location of Superior Limousine.

Phase I ESA

Waste manifests dated September 1996 through March 2018 obtained from the CT DEEP manifest database for 8 Furnace Avenue identify waste streams including corrosives and petroleum. The CT DEEP records also include a LUST report, a spill report, and two letters regarding a discharge of #6 fuel oil from the boiler room at 8 Furnace Avenue to Furnace Brook that occurred in June 1989. According to the reports, the spill discharged through grates in the boiler room floor. The LUST report (#34242) states that #6 fuel oil was leaching into the boiler room from a steel tank contained in a brick and concrete vault. The report indicated that cleanup had been initiated.

Other records on file for 8 Furnace Avenue include several spill records between 1987 and 2012. The spills included releases of pH controlled dye, ethylene glycol, diesel fuel, fuel oil, and ammonia. Each of the incident listings indicate that the spills were cleaned, and their status is listed as "closed." A CT DEEP spills reporting form indicates the main processes of Warren Corporation were blending and mixing, dyeing, spinning, twisting, weaving, mending, and finishing. The wastes contained acetic acid, formic acid, sulfuric acid, dye wastes, rinse waters containing loose fabric and ammonia, and low pH chemical waste.

4.3 Database Listing Discussion

The databases reviewed, as detailed in Section 2, indicated one off-site listing located within the approximate minimum search distance for standard databases. This listing was for 8 Furnace Avenue, which adjoins the Site to the southwest.

The 8 Furnace Avenue property, under the name Warren Woolen Mill, was identified on the CT DEEP Voluntary Remediation Program (aka "Voluntary Cleanup Program" - VCP) and CT Spills databases. According to the VCP listing the certifying party is the American Woolen Company (Jacob Long) and was entered into the program in July 2014. The spills database identified two separate spills at this facility. The first listing (November 24, 2010) states that 3 gallons of #2 fuel oil was released due to an overfill. The second spill listing (August 15, 2012) indicates that a release of 50 gallons of #2 fuel oil was reported due to a container release. Further information on both spills was not provided, other than the status being listed as "closed."

4.4 Vapor Encroachment Screening

In 2010, ASTM International issued its revised Standard E2600-10 entitled "Standard Guide for Vapor Encroachment (VE) Screening on Property Involved in Real Estate Transactions." This standard guide has been adopted into the ASTM E1527-13 Phase I ESA Standard. The purpose of the VE standard is to define good commercial and customary practice for real estate transactions in the United States for conducting a screening assessment directed solely at identifying the likelihood for vapors to migrate onto a site and creating a vapor encroachment condition (VEC). Whether or not encroaching vapors result in a vapor intrusion problem requires further investigation that is beyond the scope of the standard.

A VEC is defined as the presence or likely presence of chemicals of concern (COC) in the subsurface of the Site caused by the release of vapors from contaminated soil or groundwater on or near the Site. An area of concern (AOC) as defined in E2600-10 is measured 0.33-miles from the Site for known or suspected contaminated sites with VOCs or SVOCs, and 0.1-mile from the Site for known or suspected petroleum hydrocarbon releases. The AOC may be reduced if the groundwater flow direction is known relative to the Site. Critical distances are taken into account for contaminated groundwater plumes in any direction for COCs including petroleum Light Non-Aqueous Phase Liquid (LNAPL) accumulating

above the water table at a distance of 100 ft. from the edge of the plume to the Site, and 30 ft. for dissolved volatile petroleum hydrocarbons.

Using the information evaluated in the Sections above, Weston & Sampson performed a VE Screening in accordance with the scope of work and limitations of ASTM Standard Practice E2600-10 utilizing the EDR VEC application. We have concluded there is a potential VEC at the Site based on former spills and use of chemicals and fuel oil at the 8 Furnace Avenue property abutting the Site to the west.

5.0 DATA GAPS

All Phase I ESA reports must include an identification of "significant" data gaps (as defined in §312.20 of the AAI final rule and §12.7 of ASTM E1527-13), if any, in the information collected for the inquiry. Significant data gaps include missing or unattainable information that affects the ability of the environmental professional to identify conditions indicative of releases or threatened releases of hazardous substances, and as applicable, pollutants and contaminants, petroleum or petroleum products, or controlled substances, on, at, in or to the subject property. The documentation of data gaps must include information regarding the significance of these data gaps.

A data failure was encountered during historic use source review related to the lack of an interview with the past owner. This does not represent a significant data gap, as the historic sources available and information gleaned from interviews clearly indicate continuity of Site development and use.

No data gaps, as defined by ASTM Practice E1527-13, were noted during the Site reconnaissance and records review that would significantly affect the ability of Weston & Sampson to identify RECs in connection with the Site.

6.0 FINDINGS AND OPINIONS

Based on the information compiled in this Phase I ESA, Weston & Sampson offers the following findings and opinions for the site:

- Based on historic mapping, interview documentation, and Site visits, the Site building has been used as a storage warehouse since approximately 1930. The current owner, American Woolen, acquired the Site in 2014 and has used the building for the storage of various textile machines and equipment associated with American Woolen, which conducts their main operations west of the Site across Furnace Avenue. Staining of the concrete floor was observed throughout the main level of the building beneath and adjacent to the stored machinery and/or equipment. Additionally, containers of roofing tar, stored on the second level of the building were observed to be leaking, resulting in this material seeping through the floor and along the interior walls of the building and pooling on the concrete floor of the main level. Several empty 55-gallon plastic drums were observed on the second level of the building. Evidence of a release such as staining beneath or around the drums was not observed. It is unknown what contents were formerly stored in the drums, however, according to Mr. Long of American Woolen, containers and/or drums of soap and detergent have been stored on Site. The exact storage history of the Site prior to American Woolen's ownership is unknown. Based on the above information, it is our opinion that there exists the presence or likely presence of hazardous substances or petroleum in, on, or at the property from the use of the Site. These conditions are considered RECs. Five Areas of Concern (AOCs) have been identified as part of this REC and include:
 - AOC-1: Current machinery and equipment storage area(s) and associated staining;
 - ➤ AOC-2: Current roofing tar storage and associated staining;
 - > AOC-3: Current and/or historic use of concrete loading platforms; and
 - ➤ AOC-4: Entire main level of the building (including unknown storage history of other machinery/equipment or drums that may have stored hazardous substances or petroleum).
- The abutting property to the west across Furnace Avenue (8 Furnace Avenue) has been used for industrial purposes since the late 1800s. The property was identified on the CT DEEP Voluntary Remediation Program and Spills databases. Records obtained at the CT DEEP public file room document waste manifests for waste streams including corrosives and petroleum, several spill incident reports, and documentation related to the release of fuel oil from a leaking tank. This off-Site property is located topographically and hydrologically upgradient from the Site. This condition contributes to the moderate potential for a VEC to exist on-Site. Based on this information, it is Weston & Sampson's opinion that the conditions including documented releases on the abutting property to the west are identified as a REC and an AOC.
- The age of the on-Site building raises the potential that hazardous building materials (HBMs) including asbestos containing materials (ACMs), lead-based paint, polychlorinated biphenyls (PCB)-containing building materials and equipment, and mercury containing items (i.e. fluorescent light bulbs, thermostatic controls) were used in its construction. The presence of suspect HBMs in the buildings does not represent a release to the environment. However, it is

Weston & Sampson's opinion that HBMs will need to be assessed in order to develop potential HBM abatement costs should the buildings be renovated or demolished.

7.0 CONCLUSIONS AND RECOMMENDATIONS

Weston & Sampson has performed a Phase I ESA of a 0.930-acre parcel of land known as 21 Furnace Avenue in Stafford Springs, Connecticut. The ESA was conducted in conformance with the scope and limitations of ASTM 1527-13 and the CT SCGD. Any exceptions to, or deletions from, this practice are described in Section 1.6 of this report.

This assessment has revealed no evidence of RECs in connection with the Site except for the following:

- Current use of the Site as a storage warehouse by American Woolen Company, Inc. and unknown storage history. Four AOCs have been identified under this REC; and
- The presence of documented conditions on the upgradient industrial property to the west occupied by American Woolen's main operations building (8 Furnace Avenue) are considered a REC and AOC and contribute to Weston & Sampson's moderate VEC conclusion for the Site.

Given the findings, opinions, and conclusions discussed herein, Weston & Sampson recommends that a Phase II ESA be completed to address the RECs identified above and to more fully characterize the Site for redevelopment. The scope of work for the Phase II ESA should include advancement of soil borings, installation of monitoring wells, and the collection and analysis of soil and groundwater samples. Based upon age of construction or observations made during Site Reconnaissance, we recommend HBM be assessed as part of Phase II ESA activities to support reuse and redevelopment of the Site.

8.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Questionnaires

Initials:	

AAI – USER QUESTIONNAIRE

FOR

21 Furnace Avenue – Stafford, CT

In order to qualify for one of the Landowner Liability Protections (LLPs), the *user¹* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30 and 312.31. Failure to conduct these inquiries could result in the determination that "all appropriate inquiries" is not complete.

Environmental liens that are filed or recorded against the property (40 CFR 312.25).

Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

Yes
No
Unknown

2.Activity and use limitations (AULs) that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi)).

Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Yes
No
Unknown

Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes
No
Unknown

¹ The party seeking to complete an AAI to receive CERCLA liability protection

	Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).				
	Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?				
	Yes No Unknown				
5.	Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).				
	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, (a.) Do you know the past uses of the property? (b.) Do you know of specific chemicals that are present or once were present at the property? (c.) Do you know of any spills or other chemical releases that have taken place at the property? (d.) Do you know of any environmental cleanups that have taken place at the property?				
	Yes No Unknown				
6	The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?				
	Yes No Unknown				
7	. Reason for Phase I ESA. Please provide the reason for the Phase I ESA in the space below.

OCTOBER 28, 2020

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.

QUITCLAIM DEED

To all People to Whom these Presents shall Come Greeting:

Know Ye, That **WARREN CORPORATION**, a Connecticut corporation having an address at 711 5th Avenue, 11th Floor, New York, New York 1022 ("<u>Grantor</u>"), for the consideration of ONE (\$1.00) DOLLAR and other good and valuable consideration received to Grantor's full satisfaction from **AMERICAN WOOLEN COMPANY, INC.**, a Connecticut corporation having an address at 8 Furnace Avenue, Stafford, Connecticut 06076 ("<u>Grantee</u>"), does by these presents convey, remise, release and forever quitclaim, WITH QUITCLAIM COVENANTS, unto the said Grantee and to the Grantee's successors and assigns forever, all the right, title, interest, claim and demand whatsoever as the said Grantor has or ought to have in or to all those pieces of land, with all improvements thereon, situated in the Town of Stafford, County of Tolland, and the State of Connecticut, being more particularly described as set forth on Schedule A (the "Property").

The Property is subject to building lines if established, all laws, all provisions of any ordinances, governmental regulations, or public or private law, including building and zoning ordinances affecting the Property, and by the acceptance of this Deed, Grantee agrees to assume all taxes on the Grand List of October 1, 2013 and all subsequent years.

As a material part of the consideration for this Deed, the Property is being conveyed in an "AS IS" condition and "WITH ALL FAULTS" as of the date of this Deed. No representations or warranties have been made or are made and no responsibility has been or is assumed by Grantor or by any shareholder, partner, officer, director, employee, person, firm, agent, or representative acting or purporting to act on behalf of Grantor as to: the condition or repair of the Property; the compliance or non-compliance of the Property with applicable laws, rules, regulations, codes, ordinances, or the like; the absence or presence of any hazardous, regulated or toxic substances or wastes in, on, under, relating to, or about the Property; the value, liability expense of operation, or income potential of the Property; or any other fact or condition which has or might affect the Property or the condition, repair, value, expense of operation, or income potential of the Property or any portion thereof. Grantee has relied solely upon the results of Grantee's own inspections or other information obtained or otherwise available to Grantee, rather than any information that may have been provided by Grantor to Grantee.

To Have and to Hold the Property hereby conveyed, remised, released and quitclaimed with all the appurtenances unto the said Grantee and to the Grantee's successors and assigns forever, so that neither the Grantor nor the Grantor's successors or assigns nor any other person claiming under or through the Grantor shall hereafter have any claim, right or title in or to the Property or any part thereof, but therefrom the Grantor and they are by these presents, forever barred and excluded.

SCHEDULE A

LEGAL DESCRIPTION

8 Furnace Avenue, Stafford, Connecticut (Town of Stafford Assessor's ID 51/38) (Parcel I)

Beginning at a point in the northeast corner of land now or formerly of the Stafford Savings Bank at a point in the westerly line of Furnace Avenue; thence running northerly along the westerly line of said Furnace Avenue four hundred fifty (450) feet, more or less, to a point in the southerly line of High Street at the intersection of said Furnace Avenue and said High Street, thence running westerly along said southerly line of High Street to the northeast corner of land now or formerly of Edmond and Barbara Mattarelli; thence running southerly along land of said Edmond and Barbara Mattarelli, land now or formerly of Eva Hudon, land now or formerly of Leon Foisy and land now or formerly of Leonard and Verna Boudreau, partly on each, five hundred forty (540) feet, more or less, to the canal which runs across the property being described; thence running southwesterly along the canal to the northeast corner of land now or formerly of Olive F. Stengel; thence running southerly along land of said Olive F. Stengel to the northwesterly corner of land of the Stafford Springs Congregational Church; thence running northeasterly along of said Stafford Springs Congregational Church one hundred (100) feet, more or less, to a point in the southerly boundary of land now or formerly of the Stafford Savings Bank; thence running westerly along land of said Bank to the southwest corner of land of said Bank; thence running northerly along land of said Bank sixty (60) feet, more or less, to the northwest corner of land of said Bank thence running easterly, still along land of said Bank, eighty (80) feet, more or less to the point or place of beginning.

Subject to a right-of way in favor of Stafford Savings Bank to pass and repass over existing driveways on land of The Cyril Johnson Woolen Company lying northerly and westerly of land now or formerly of Stafford Savings Bank as set forth in deed dated March 21, 1927 and recorded in Volume 64, page 237 of the Stafford Land Records.

Being <u>PARCEL I</u> as set forth in the Limited Warranty Deed of Andav Property Associates, Inc. to Warren Corporation dated 2/1/1988 and recorded in Volume 249, Page 440 of the Stafford Land Records.

21 Furnace Avenue, Stafford, Connecticut (Town of Stafford Assessor's ID 51/116) (Parcel II)

Beginning at a point in the northerly boundary line of land now or formerly of Adelbert W. Squire twenty-one (21) feet, more or less, distant westerly, measured at right angles, from Station 70+10 of the proposed Furnace Brook Channel centerline; thence running northerly one hundred twenty-five (125) feet, more or less, parallel to said centerline on the arc of a circle whose radius is 1421 feet to a point; thence running N 29° 14' 24" E ninety-one and eighty hundredths (91.80) feet to a point twenty-one (21) feet distant westerly, measured at right angles, from Station 72+25 of said centerline; thence running N 52° 27' 30" W ninety-three and twenty-five hundredths (93.25) feet to the northeasterly corner of a two-story brick building; thence running N 70° 34' 30" W eighty-three and five hundredths (83.05) feet to the northwesterly corner of

Book: 616 Page: 711 Page: 4 of 9

VOL. 616 PAGE 714

said building at a point in the easterly line of Furnace Avenue; thence running southerly along said Furnace Avenue four hundred (400) feet, more or less, to the northwesterly corner of land of said Adelbert W. Squire; thence running easterly along land of said Adelbert W. Squire one hundred twenty-four (124) feet, more or less, to the point or place of beginning.

Said parcel is fully shown on a map entitled "Map of Portion of Property of Cyril Johnson Woolen Company, Incorporated to be acquired by the State of Connecticut for the Furnace Brook Channel Improvement Furnace Brook-Middle River Watershed Protection Program, Stafford Springs, Connecticut. Scale 1" = 20' November, 1961 revised January, 1962."

Being <u>PARCEL II</u> as set forth in the Limited Warranty Deed of Andav Property Associates, Inc. to Warren Corporation dated 2/1/1988 and recorded in Volume 249, Page 440 of the Stafford Land Records.

18 Furnace Avenue, Stafford, Connecticut (Town of Stafford Assessor's ID 51/14) (Parcel Ia.)

Beginning at a point in the westerly line of Furnace Avenue fifty-one and five-tenths (51.5) feet, more or less, southerly from a twelve - (12) foot right-of-way intersecting said Furnace Avenue, which point is also the southeasterly corner of land now or formerly of Napoleon and Rosanna Roberts; thence running southerly along the westerly line of said Furnace Avenue to a point in the northerly line of High Street at the intersection of said Furnace Avenue and said High Street; thence running westerly along the northerly line of said High Street to land of said Napoleon and Rosanna Roberts; thence running northeasterly one hundred fifteen (115) feet, more or less, to the point or place of beginning; and being a small triangular piece bounded easterly by Furnace Avenue; southerly by High street and northwesterly by land now or formerly of Napoleon and Rosanna Roberts.

Being <u>PARCEL Ia.</u> as set forth in the Limited Warranty Deed of Andav Property Associates, Inc. to Warren Corporation dated 2/1/1988 and recorded in Volume 249, Page 440 of the Stafford Land Records.

<u>0 Furnace Avenue, Stafford, Connecticut (Town of Stafford Assessor's ID 51/127) (Parcel III)</u>

Beginning at a point on the easterly side of Furnace River on the southerly face of the mill dam now or formerly of Cyril Johnson Woolen Company at the northwest corner of land now or formerly of Mabel Palmer; thence running southerly along said land now or formerly of Mabel Palmer to a point which marks the northeasterly corner of said land now or formerly of Mabel Palmer and the northwesterly corner of land now or formerly of Wallace E. Gero; thence running southeasterly along said land now or formerly of Wallace E. Gero fifty (50) feet, more or less, to land now or formerly of Francis B. Rodlun; thence running northeasterly along said land now or formerly of Frances B. Rodlun to a point which marks the northwesterly corner of said land now or formerly of Frances B. Rodlun and the southwesterly corner of land now or formerly of the estate of Domenico Sartori; thence continuing northeasterly along said land now or formerly of

Book: 616 Page: 711 Page: 5 of 9

VOL. 616 PAGE 715

the Estate of Domenico Sartori and along land now or formerly of Edward and Dorothy Roberts, partly by each, one hundred five (105) feet, more or less, to the northwesterly corner of said land now or formerly of Edward and Dorothy Roberts; thence running westerly seventy-five (75) feet, more or less, to the easterly bank of the millpond now or formerly of Cyril Johnson Woolen Company; thence running southerly along the easterly bank of said pond to a point fifteen (15) feet northerly of the line of the northerly face of the abutment at the easterly end of the mill dam; thence running westerly across the pond to the southeasterly corner of land now or formerly of Warren Woolen Company; thence running westerly along said land now or formerly of Warren Woolen Company to a point in the easterly line of Furnace Avenue; thence running southerly along the easterly line of Furnace Avenue fifteen and thirty-eight hundredths (15.38) feet to land now or formerly of the State of Connecticut; thence running southerly twenty-two (22) feet along said land of the State of Connecticut to a point; thence running southeasterly fifty-five and fortyseven hundredths (55.47) feet along said land of the State of Connecticut to a point; thence running southeasterly two hundred twenty-five (225) feet, more or less, along said land of the State of Connecticut to westerly boundary of property now or formerly of said Mabel Palmer; thence running northerly along said land now or formerly of Mabel Palmer to the point or place of beginning.

Together with all water rights and privileges, if any, in the pond north of the dam referred to in the paragraph respecting Parcel III above, said water rights being described more particularly in a deed of Jasper H. Bolton to Granite Mill Company, dated February 2, 1853, and recorded in the Stafford Land Records, Volume 22, page 57, and also the right, if any, to take water for mill purposes from said pond, through the said canal, and to discharge the same through the tail-race of said company running southerly from the mill buildings across said property, across the land now or formerly of the Congregational Society of Stafford Springs, across Main Street in said Stafford Springs, across land over which the Vermont Central Railway Company maintains railroad tracks, to the Middle River; and/or the City Sewer to the Municipal Waste Treatment Plant; and together with the right, title and interest, if any, in and to any dam or dams situated on any of the Parcels I, Ia, II and III above.

Being <u>PARCEL III</u> as set forth in the Limited Warranty Deed of Andav Property Associates, Inc. to Warren Corporation dated 2/1/1988 and recorded in Volume 249, Page 440 of the Stafford Land Records.

0 Furnace Avenue, Stafford, Connecticut (Town of Stafford Assessor's ID 51/7)

That certain piece or parcel of land located in the Town of Stafford, County of Tolland, and State of Connecticut, and being more particularly bounded as follows:

EASTERLY: By Furnace Avenue, 250 feet more or less;

NORTHERLY: By the intersection of Furnace Avenue and Silver Street, 20 feet

more or less;

Book: 616 Page: 711 Page: 6 of 9

VOL. 616 PAGE 716

WESTERLY:

By Silver Street, 270 feet more or less; and

SOUTHERLY:

By land now or formerly of Girolamo & Ramona Randazzo, in part, and by land now or formerly of Linda Tonoli, in part, and by land now or formerly of Wayne & Jean Pisciotta, in part, in all 192

feet more or less.

Said piece or parcel of land is shown as "#0 Furnace Avenue Map 51 Lot 7" on the plan entitled "PLAN PREPARED FOR WARREN CORPORATION FURNACE AVENUE, RIVER ROAD STAFFORD SPRINGS, CONN. COMPILATION PLAN" dated May 6, 2014 and prepared by Meehan & Goodin Engineers – Surveyors, P.C., a copy of which is on file or is to be filed with the Clerk of the Town of Stafford.

29 Furnace Avenue, Stafford, Connecticut (Town of Stafford Assessor's ID 50/28)

Piece 1:

The following tracts of land situated on the East side of Furnace Avenue in the Borough of Stafford Springs, Town of Stafford, and State of Connecticut that were conveyed to The Warren Woolen Company by deed recorded at Volume 45, Page 578:

First Tract:

Commencing at the northeast corner of first tract at a point in the East line of Furnace Avenue thence South 71 1/4 degrees East, twenty-nine and four tenths fee (29 4/10) to an iron pin in the ground which iron pin is on a line with the West side of the brick tower to the mill standing on the tract herein conveyed and thirty-one fee (31) northerly of said tower; thence said line continues one hundred thirty-three and one-half fee (133 1/2) to a drill mark in an abutment stone on the West side of The Central Woolen Company's mill pond now owned by Cyril Johnson; thence Southerly following the line of said mill pond to the South line to a stone post which stone post is in line with the West side of the ell to stonehouse on the tract herein conveyed and sixteen and three-tenths (16 3/10) feet Southerly of the southwest corner of said ell, a direct line from said drill mark in abutment stone post is near South 31 degrees West two hundred and two feet (202); thence from said stone post North 67 3/4 degrees West eighty-one and one-fourth feet (81 1/4) to the East line of said Furnace Avenue; thence North 7 degrees East one hundred ninety-two and eight-tenths (192 8/10) feet to place of beginning, as per map and survey of September 10, 1897, said tract being bounded North by land of The Warren Woolen Company: East by the mill pond formerly owned by The Central Woolen Company but now owned by Cyril Johnson; South by land of Cyril Johnson but formerly owned by The Central Woolen Company and West by the street known as Furnace Avenue, together with all the buildings thereon standing. Said real estate being the same as was conveyed by The Warren Woolen Company to The Stafford Worsted Company by their deed of October 5, 1897 and recorded in Stafford Land Records, Vol. 41, Pages 142, 143, 144, 145 and 146.

Second Tract:

Book: 616 Page: 711 Page: 7 of 9

VOL. 616 PAGE 717

Commencing at the Southwest Corner of land above described on the East side of Furnace Avenue; thence Easterly on land above described to the reservoir of Cyril Johnson formerly owned by The Central Woolen Company; thence Southerly on said reservoir to a small elm tree situated twenty-seven fee about Northwesterly of the Westerly end of the canal of said Johnson; thence Westerly on an imaginary line parallel to the Northern boundary of said tract to Furnace Avenue; thence Northerly on Furnace Avenue to place of beginning.

Piece 2:

The following tract of land that was conveyed to The Warren Woolen Company by deed recorded at Volume 59, Page 249:

The tract of land, with the buildings thereon, situated in the Town of Stafford, on the east side of Furnace Avenue, in the Borough of Stafford Springs, bounded north, east and south by land now or formerly of the Warren Woolen Company and west by Furnace Avenue, together with all the rights and privileges belonging thereto.

Piece 3:

All those pieces or parcels of land conveyed to The Warren Woolen Company by deed recorded at Volume 30, Page 346.

Excepting from the foregoing three (3) Pieces all those highways reserved to the use of the public, as reserved in the deed to Daniel D. Warren from the Conversville Company dated September 8, 1879 and recorded in Volume 31, Page 642 of the Stafford Land Records, and also that portion of Furnace Avenue determined by agreement between the Borough of Stafford Springs and The Warren Woolen Company dated December 22, 1926 and recorded in Volume 64 at Page 148 of The Stafford Land Records.

Also excepting from the foregoing three (3) Pieces all of the parcels conveyed out by The Warren Woolen Company or Warren Corporation, including, without limitation, the parcels described in the following instruments:

- 1. Warranty deed to Mary C. Kafka and Mary Kafka Simons dated May 23, 1936 and in Volume 75 at Page 151 of the Stafford Land Records;
- 2. Warranty deed to Antonia Della Bella dated May 23, 1936 and recorded in Volume 75 at Page 152 of the Stafford Land Records;
- 3. Warranty deed to Florance M. Jacobsen dated May 23, 1936 and recorded in Volume 75 at Page 164 of the Stafford Land Records;
- 4. Warranty deed to Clifford E. Jacobsen dated May 23, 1936 and recorded in Volume 75 at Page 166 of the Stafford Land Records;
- 5. Warranty deed to Francis W. Chaffee and Addie H. Chaffee dated May 29, 1936 and recorded in Volume 75 at Page 161 of the Stafford Land Records;

Book: 616 Page: 711 Page: 8 of 9

VOL. 616 PAGE 718

6. Warranty deed to Francis W. Chaffee and Addie H. Chaffee dated May 29, 1936 and recorded in Volume 75 at Page 162 of the Stafford Land Records;

- 7. Warranty deed to Paul Mocko and Kristina Mocko dated July 2, 1936 and recorded in Volume 75 at Page 180 of the Stafford Land Records; and
- 8. Warranty deed to Paul Mocko and Kristina Mocko dated July 2, 1936 and recorded in Volume 75 at Page 181 of the Stafford Land Records.

Subject to the terms and provisions of an Agreement dated December 22, 1926 between the Borough of Stafford Springs and The Warren Woolen Company and recorded in Volume 64 at Page 148 of the Stafford Land Records.

29 West Street, Stafford, Connecticut (Town of Stafford Assessor's ID 48/30.1)

That certain piece or parcel of land (hereinafter the "Premises") located in the Borough of Stafford Springs, County of Tolland and State of Connecticut, known as No. 29 West Street as shown on a map or plan entitled "Plan Prepared for Package Machinery Company West Street Stafford Springs, CT. Boundary Survey Scale 1"=40' Dated 7-26-86 DRN. R.E.D. TRD. A.V.H. File No. 86844 Sheet Nos. 1 of 2 and 2 of 2 Meehan Associates Consulting Engineers-Surveyors, P.C. 387 North Main Street Manchester, CT 06040", which map or plan is on file in the Town of Stafford Town Clerk's Office (hereinafter referred to as "Map"), to which reference may be had, and being more particularly bounded and described as follows:

BEGINNING at a point in the northeasterly line of land now or formerly of the Central Vermont Railroad, which point marks the northwesterly corner of land now or formerly of Trieste Services, Inc. shown as "Tract A" on said Map (hereinafter "Tract A") and the southwesterly corner of the First Parcel herein described; thence running N 37°-48'-28" W, 295.72 feet to a point; thence running S 22°-11'-32" W, 9.53 feet to a point; thence running N 37°-48'-28" W, 513.58 feet to a point; said last three courses running along land now or formerly of Central Vermont Railroad; thence running N 09°-43'-22" E, 161.90 feet to an iron pin; thence running S 87°-14'-48" E, 58.62 feet to a point; thence running S 88°-15'-52" E, 331.55 feet to a point; thence running S 86°-13'-37" E, 87.96 feet to a point; said last four courses being along land now or formerly of Royce; thence running S 37°-56'-02" E, 190.00 feet to a point; thence running S 07°-20'-02" E, 429.90 feet to a point; thence running S 37°-56'-02" E, 45.18 feet to a point; thence running S 52°-03'-58" W, 259.68 feet to the point or place of beginning; said last four courses being along Tract A.

Said Parcel is shown as "1st Parcel Tract B <u>AREA</u> 328544.24 S.F. 7.54 AC." on Sheet No. 2 of 2 of said Map.

Together with all the appurtenant easements and all the rights set forth in a deed from Trieste Services, Inc. to Package Machinery company dated September 11, 1986 and recorded in the Stafford Land Records in Volume 29 at Page 599, except for the option to purchase the premises described in Exhibit C in said deed, and except that the rights, privileges and easements pertaining to the sprinklers and hydrants described in Exhibit B in said deed shall be used in

Book: 616 Page: 711 Page: 9 of 9

VOL. 616 PAGE 719

common with the owner of the premises known as 24 West Street, Stafford Springs, Connecticut and its successors and assigns.

Being all and the same premises as set forth in the Quit Claim Warranty Deed of Package Machinery Company to Warren Corporation dated 10/7/1993 and recorded in Volume 311, Page 132 of the Stafford Land Records.

69 Furnace Avenue (Unit C-3), Stafford, Connecticut (Town of Stafford Assessor's ID 50/28.1/C-3)

Unit C-3 of the Glenville Condominium, which Glenville Condominium was created by that certain Declaration Glenville Condominium dated July 22, 1981 and recorded in Volume 192, Page 211 of the Stafford Land Records, as amended. Glenville Condominium is located in the Town of Stafford, Connecticut.

93 Furnace Avenue (Unit N-6), Stafford, Connecticut (Town of Stafford Assessor's ID 50/28.1/N-6)

Unit N-6 of the Glenville Condominium, which Glenville Condominium was created by that certain Declaration Glenville Condominium dated July 22, 1981 and recorded in Volume 192, Page 211 of the Stafford Land Records, as amended. Glenville Condominium is located in the Town of Stafford, Connecticut.

93 Furnace Avenue (Unit N-7), Stafford, Connecticut (Town of Stafford Assessor's ID 50/28.1/N-7)

Unit N-7 of the Glenville Condominium, which Glenville Condominium was created by that certain Declaration Glenville Condominium dated July 22, 1981 and recorded in Volume 192, Page 211 of the Stafford Land Records, as amended. Glenville Condominium is located in the Town of Stafford, Connecticut.

The intent of this Deed is to convey to Grantee all of the real property owned by the Grantor located in the Town of Stafford, Connecticut.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page	
STAFFORD CLEANERS	27 E MAIN ST	S 0 - 1/8 (0.050 mi.)	B5	16	
EPA ID:: CTD018813667					

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

CT LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's Leaking Underground Storage Tank List.

A review of the CT LUST list, as provided by EDR, and dated 06/29/2020 has revealed that there are 7 CT LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program,

which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 06/01/2020 has revealed that there are 2 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

US DOT Description: WASTE TETRACHLOROETHYLENE

Number of Containers: 001
Container Type: DF
Quantity/Weight/Volume: 60/P

Batch Number: 1584, 1584, 4466, 4466

EPA Waste Codes: F002 - THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE,

CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2,

TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND

SPENT SOLVENT MIXTURES.

US DOT Description: WASTE TETRACHLOROETHYLENE

Number of Containers: 001 Container Type: DM Quantity/Weight/Volume: 60/P

Batch Number: 858, 858, 896, 896

EPA Waste Codes: F002 - THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE,

CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2,

TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005: AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND

SPENT SOLVENT MIXTURES.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

Number of Days to Update: 22

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

SEH: List of Significant Environmental Hazards Report to DEEP

The Significant Environmental Hazard Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Elevation: 512 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 5642457 STAFFORD SPRINGS, CT

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

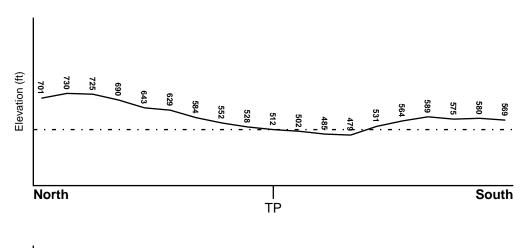

TOPOGRAPHIC INFORMATION

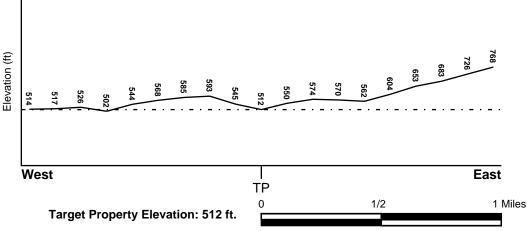

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NWI Quad at Target Property Data Coverage

STAFFORD SPRINGS YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

> 0 inches

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: material

Hydrologic Group: Not reported

Soil Drainage Class: Hydric Status: Unknown

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX D

State Records

STATE OF CONNECTICUT DEPARTMENT OF ENVIRONMENTAL PROTECTION

July 18, 1989

Honorable Clarine Nardi Riddle Attorney General State of Connecticut 30 Trinity Street Hartford, CT 06106

Re: Warren Corporation, Stafford Springs, CT

Dear Ms. Nardi Riddle:

Enclosed please fire this Departments file on the above named corporation and the record of the violation of Sections 22a-430 and 22a-450 of the Connecticut General Statutes, occurring prior to June 12, 1989.

Warren Corporation, Furnace Avenue, Stafford Springs, CT, owner of this facility, had knowledge of an ongoing discharge of #6 fuel oil to Furnace Brook, and failed to report this as required by the C.G.S. Any oil spillage in the boiler room area discharges directly to Furnace Brook via grates in the boiler room floor.

We believe this incident of discharging without a permit and non reporting is serious enough to warrant enforcement action by your office.

If you require additional information or assistance regarding this matter, please contact Matt Williamson of the Oil & Themical Spill Section at 566-4633.

Sincerely,

slie Carothers, Commissioner

epartment of Environmental Protection

Subject: OIL SPILL ON FURNACE POND, WARREN CORPORATION, FURNACE AVENUE, STAFFORD SPRINGS, CT

A #6 oil spill was reported on Furnace Pond 6/12/89 by Tri-S, Inc. of Ellington at 1312 hrs. The spill was first brought to the attention of Joseph Osborne Warren Corp's Environmental Affairs supervisor at approximately 1130 hrs by a Tri-S salesman. Mr. Osborne stated the spill was the result of a past reported spill and contracted Tri-S to contain the oil. At approximately 1400 hrs I arrived at the Warren Corp. and met with Mr. Osborne who escorted me throughout the property. The investigation found the problem to be a transfer pump in the boiler room leaking into floor grates which empty directly to Furnace Pond. The spill was contained by using permanent boom and sorbent materials.

I would like to bring to your attention several points which may require further attention: 1. The boiler blowdown is a direct discharge to Furnace Pond;

- 2. Floor grates which contain the boiler blow down lines act as a direct discharge point to Furnace Pond for any oil spilled in the boiler room;
- 3. Warren Corp. failed to report the spill to OCSS. I feel that Tri-S was acting independently of Warren Corp. when reporting to protect themselves from any possible prosecution.

Ms. Helen Robbins
Bureau of Waste Management
CT DEP
79 Elm Street
Hartford, CT 06106-1632

Dear Ms. Robbins:

This is to inform you that toward the end of November 1998, the new outside aboveground tank was put in place. As of yesterday January 14, 1999, the above tank was finally put in operating condition.

Consequently the old tank is now out of service and will be stripped out in spring

by our contractor Meeker Pump and Tank.

Please, feel free to call for further information.

Sincerely,

Giuseppe Santoro Plant Engineer

Cc: Mr. Brian Coss

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Weston & Sampson Engineers, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Photo Log

Photo 1: View looking southeast at the Site.

Photo 2: View of loading platform on southside of the building.

Photo 3: View of rear, east side of the building.

Photo 4: View of Machinery/Equipment Storage (Main Level).

Photo 5: View of staining on the concrete floor (Main Level).

Photo 6: View of roofing tar pooled on concrete floor (Main Level).

Photo 7: View of drum storage (Second Level).

Photo 8: View of additional equipment storage (Second Level).

Photo 9: View of roofing tar container storage (Second Level).

Photo 10: View of a release of roofing tar (Second Level).

Photo 11: View of damaged portion of second level.

Photo 12: View of eastern side of second level.

Photo 12: Five gallon container of gasoline and numerous five gallon containers of roofing tar.

Photo 14: Well connected to sprinkler system on-Site.

Photo 15: View of Furnace Brook Dam and 29 Furnace Avenue property, north of the Site.

Photo 16: View of Furnace Brook located east of the Site.

Photo 17: View looking southwest at the southern abutting building and the main American Woolen Building (8 Furnace Avenue) across Furnace Avenue.

APPENDIX L

Qualifications of Environmental Professionals

BACKGROUND

2019-Present Senior Project Scientist Weston & Sampson

> 1992-2018 Senior Scientist Eversource Energy

1987-1992 Scientist Northeast Utilities

1984-1986 Hydrogeologist Leggette, Brashears and Graham

EDUCATION

1983 Master of Science Geology University of California

1977 Bachelor of Arts Environmental Science Wesleyan University

PROFESSIONAL CERTIFICATION

Licensed Environmental
Professional
Connecticut

OSHA 40 Hour Hazardous Waste Site Worker Training

OSHA 8 Hour Hazardous Waste Site Worker Supervisory Training

> OSHA 10 Hour Construction Training

OSHA 2 Hour Asbestos Awareness Training

PROFESSIONAL ORGANIZATION

Environmental Professionals' Organization of Connecticut

American Geophysical Union

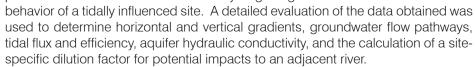

Geological Society of America

National Ground Water Assocation

Paul is a Connecticut Licensed Environmental Professional with more than 30 years of experience in the investigation of a variety of sites impacted by soil, sediment, and groundwater contamination. His experience includes hydrogeologic assessments, water supply, site and remediation management, contractor oversight, litigation support, and regulatory compliance.

SPECIFIC PROJECT EXPERIENCE

Former Manufactured Gas Plant, Norwalk, Connecticut. Deployed a large array of recording pressure transducers to assess the hydrogeologic

Retired Electrical Substations, Multiple Sites, Connecticut. Evaluation and remediation of former electrical substation properties for future site redevelopment opportunities. Involved the development of proposals, work scopes, sampling plans, evaluation of remedial options, clean-up oversight, and documentation. Characterization of impacts from the operation and maintenance of oil-filled electrical equipment, property vegetation management practices, and prior historical site uses.

Maintenance Facility, East Hampton, Connecticut. Conducted an examination of historical records and recent investigatory findings that resulted in the submittal of documentation supporting closure of a legacy CT DEEP Consent Order and Significant Environmental Hazard at this former leaking underground storage tank site. Based on data obtained from the long-term operation of the site's pump and treat system, determined that continuing impacts to groundwater were likely the result of contaminated soils that had not been removed during excavation of the leaking UST. Designed a limited site investigation to define the extent of residual impacts and evaluate the potential to implement in-situ remedial measures. Results from this investigation will be used to support closure of the site's final remaining consent order.

Site Assessment, Glastonbury, Connecticut. Provided technical review of a Phase I Environmental Site Assessment conducted in support of a prospective purchaser's due diligence efforts. The 500+ acre multi-parcel property included historical agricultural use and operation of a water supply reservoir and chlorine treatment system. Examination of earlier site assessment reports and other supporting documentation resulted in a favorable recommendation to the client, but with stipulations regarding potential future uses of the property.

Maintenance Facility, Madison, Connecticut. Conducted a detailed review of 5+ years of groundwater monitoring data, which revealed the current remedial system was no longer effectively removing residual gasoline contamination in the site's shallow unconsolidated aquifer. Designed a targeted soil boring investigation which revealed localized pockets of contamination residing just above and below the water table. Using analytical data obtained from the soil borings, worked with insitu remediation experts to design a proposed remedial program that incorporates the injection of micron-scale activated carbon and various amendments to support enhanced in-situ bioremediation.

Former Manufactured Gas Plant, Dover, New Hampshire. Performed an in-depth evaluation of historical groundwater quality data and an examination of operational records from a coal tar recovery well pumping system. Based on the findings of this evaluation, designed a soil boring program to define the extent of remaining coal tar sources in the subsurface and assess the viability of continuing tar recovery operations. Using results obtained from the soil boring program, recommended future remedial options that incorporate targeted excavation, in-situ soil stabilization (ISS), and localized treatment using in-situ chemical oxidation (ISCO).

Site Assessment and Remediation, Eversource Energy, Berlin, Connecticut. Senior scientist/project manager for multiple sites owned by Eversource Energy in Connecticut, Massachusetts, and New Hampshire. Responsibilities included:

- Preparation, review and evaluation of bid specifications, project proposals, work scopes, health and safety plans, and QA/QC protocols
- Project budgeting and financial management
- Report preparation and presentations
- Planned and implemented investigations of commercial and industrial sites for property transfer and due diligence evaluations
- Managed remediation of multiple manufactured gas plant sites involving large scale excavations, in-situ solidification, and capping of tar deposits
- Environmental compliance for sites with long-term monitoring and/or reporting obligations for state regulatory programs
- Litigation and expert witness support

Additional experience includes building demolition, substation decommissioning, gas line installations in public roadways, and electric transmission corridor assessments. Soil, groundwater, and waste materials management. (with former employer)

Site Investigations, Northeast Utilities, Berlin, Connecticut. Project hydrogeologist for the investigation of sites impacted by underground storage tanks, surface impoundments, manufactured gas plants, utility rights-of-way, substations, and industrial and commercial properties. Designed, installed, and evaluated soil venting and product recovery systems. Implemented and managed long-term groundwater monitoring networks. Provided RCRA Part B detection monitoring, assessment monitoring, closure documentation, and quarterly and annual reporting. (with former employer)

Phase I Site Assessment

Background

2009-Present Senior Environmental Scientist Weston & Sampson

> 2002-2009 Senior Project Scientist BL Companies

Education

2002 Bachelor of Science Environmental Earth Science Southern Connecticut State University

Professional Societies

Environmental Professionals' Organization of Connecticut

Professional Certifications

2004

OSHA 29 CFR 40-Hour Hazardous Waste Site Operations Training

2005-Present OSHA 1910.120 8-Hour Refresher Course

EXPERIENCE

s. Yellen is an environmental scientist with 12 years of experience in the environmental sciences consulting industry. Her varied technical background includes the completion of Phase I, Phase II and Phase III Environmental Site Assessments (ESAs), Property Condition Assessments, and Aquifer Testing. Ms. Yellen is part of Weston & Sampson's Brownfields and Environmental team. She has performed environmental assessments throughout the region, including projects in Connecticut, Massachusetts, and New York.

SPECIFIC PROJECT EXPERIENCE

Various Sites - Ms. Yellen has completed more than 300 Phase I ESAs on residential, commercial, school, and industrial properties throughout New England for commercial interests and developers.

Competed Environmental Condition Assessment Forms (ECAFs) and CT DEEP Forms (I, II, III, IV) for commercial and industrial properties subject to the CTA. Ms. Yellen has also trained multiple junior staff members on the completion of Phase I ESAs.

Coordinates and manages field sampling for Eversource Energy/Western Massachusetts Electric Company (WMECO) at numerous electrical substations throughout Connecticut and Massachusetts. Tasks have included coordinating and overseeing junior staff for field work, data management, tabulation, and review, letter report preparation, and correspondence with the client throughout the project duration.

Coordinated and managed field work for multiple tasks for the Town of Deerfield, associated with ongoing investigations for the Lee Road Landfill. Tasks included preparing budgets and proposals and coordinating with the client, MADEP officials, subcontractors, and field staff from various offices. Other tasks have included data review, submittal of reportable conditions, and report preparation.

Coordinates and manages ongoing field and office work for multiple tasks associated with Eversource Energy's Madison Area Work Center. Tasks include preparing and tracking budgets and coordinating with the client and field staff. Other tasks include the review of data, preparation of required monthly reports, and CTDEEP submittals.

Provided Phase II and III site investigation services for the Eversource Energy Former Manufactured Gas Plant (MGP) in Putnam, Connecticut. Ms. Yellen was responsible for coordinating and performing the various stages of field work including oversight and documentation of site screening methods including a Ground Penetrating Radar (GPR) survey and TarGOST drilling. Ms. Yellen was on site to log and document soil conditions during test pitting and roto-sonic drilling activities. Other field tasks included sampling sediment and surface water along transects of the Quinebaug River, coordinating field staff to perform well development and sampling, and assisting in the preparation of the technical report.

Provided Phase II ESA services for a proposed Department of Public Works Facility in East Lyme, Connecticut. Ms. Yellen was responsible for the oversight of the advancement of soil borings and the installation of ground water monitoring wells, collection of soil and ground water samples, comparing analytical data to the Connecticut Department of Energy and Environmental Protection (CT DEEP) Remediation Standard Regulations (RSRs), and preparing a technical environmental report.

Various Sites - Completed Phase II and Phase III Site Investigations and UST closures associated with potential real estate transactions and to achieve compliance with the RSRs. Responsibilities included the preparation of proposals and cost estimates, execution of field sampling programs, including the supervision of the completion of test borings, the installation of monitoring wells, the logging of borings, the collection of soil and ground water samples, the completion of soil gas surveys, and conducting data analysis and final report preparation.

Provided geotechnical services for a proposed Department of Public Works facility in Waterbury, Connecticut. Responsible for the oversight of the advancement of soil borings, logging of borings, and the collection of soil and concrete samples.

Dry Cleaners, West Haven, Connecticut – Served a senior project scientist for an active dry cleaning facility, subject to the Connecticut Transfer Act (CTA), of which a release of chlorinated solvents was detected in ground water beneath the site. Project responsibilities included the completion of quarterly groundwater monitoring at the site in accordance with the requirements of the CTA and RSRs, the completion of a receptor study which consisted of the identification and sampling of drinking water wells located within a 1000-foot radius of the site, and the on-going monthly sampling of Granular Activated Carbon (GAC) Filter Systems installed at two properties adversely affected by the release which are located hydraulically downgradient of the site. An additional responsibility included the completion of a Dry Cleaning Establishment Fund Application for the site to provide assessment and remediation funds to achieve remediation and retain the dry cleaning business.

Coordinated and performed Phase I Environmental Site Assessments and/or Phase II Site Investigations on eight previous sites as part of a Brownfields Assessment Grant for the Franklin Regional Council of Governments (FRCOG). The various sites ranged from benign vacant lots to large former industrial properties with complex environmental histories. Tasks included historical research at local and state agencies, a site reconnaissance, soil sampling, data analysis, and report writing. Additionally, a chemical container inventory consisting of a physical inspection of various size and types of containers, identification of each container, documentation of their location, condition, and type was performed at one of these sites. Responsibilities associated with this field effort included development of inventory field sheets, a health & safety plan, coordination with local authorities, organization of the field data into a usable database, and a report.

Worked on numerous EPA-funded Brownfield projects, including assessments of mill building, former manufacturing facilities, sawmills, and multiple municipal parcels. Ms. Yellen has also helped manage the EPA Brownfields Program. She has presented at community outreach meetings as well as provided quarterly reports and database updates to EPA.
