

NO TRASH BAGS!

Storm Debris Removal Guidelines

In the aftermath of a storm, the City of St. Petersburg works around the clock to remove debris, make roadways accessible, and allow residents to get back to normal as soon as possible. Help expedite storm debris removal by following these guidelines.

Collected Items

<input type="checkbox"/> Vegetative debris	branches, leaves, logs, and plants
<input type="checkbox"/> Fencing materials	fences knocked over during the storm
<input type="checkbox"/> Electronics	computers, televisions, and other devices
<input type="checkbox"/> Construction Materials	building materials, carpet, drywall, furniture, lumber, plumbing
<input type="checkbox"/> Appliances	air conditioners, dishwashers, washers and dryers, stoves, refrigerators, water heaters

Note:

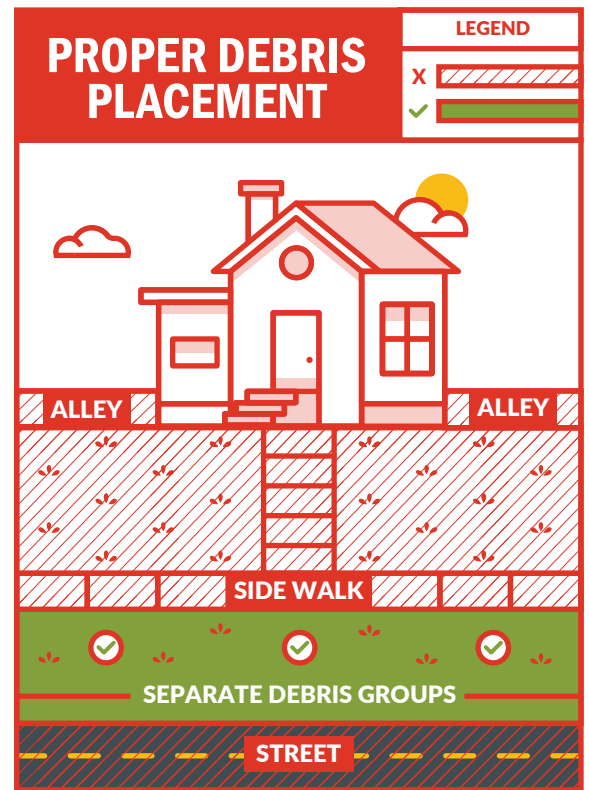

- * If vegetative debris can fit in your City trash bin with the lid closed, place it there first.
- * Be sure to separate debris into item groups.
- * Household trash and recycling should still be placed in their bins and will be collected through the normal pickup schedule.

Placement

- * Regardless of where your trash is picked up, place debris in front of the house near the roadway curb.
- * **DO NOT** place debris in trash bags.
- * **DO NOT** place debris near trees, poles, fire hydrants, utility boxes, or other structures that make debris removal difficult.

Stay Informed:

For real-time updates on debris and storm recovery, follow @StPeteFL on social media or visit stpete.org/Hurricane

- * **DO NOT** place debris in alleyways or on sidewalks.
- * **DO NOT** place debris in the street or block roadways.
