

## Maintenance Report for Period 8/8/23 – 9/11/23

Good afternoon, hope everyone's doing well. As always it seemed to be another busy month in the maintenance department. We pushed through the heat found a couple of things to do in the shade a few days. I submitted a single bid for the bathrooms at the legion park to Austin this morning I'm still waiting on a second bid to come in. I hope to get that in the next week or two, I will be reaching out to the contractor and checking on its status in the next couple of days. The band stand still has a few loose ends to be finished were waiting on some metal and Top Bead welding to finish the front extension. It's at the town shop if anyone would like to see. If you have any questions on what the maintenance department is into, or questions on what we've done please don't hesitate to call. Now onto the list.
