### PUBLIC NOTICE

#### IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

#### Truth or Consequences Water System Returned to Compliance

*Este informe contiene información importante acerca de su agua potable. Haga que alguien lo traduzca para usted, o hable con alguien que lo entienda.*

The City of Truth or Consequences is providing this updated public notice to inform our customers that the deficiencies identified during the May 6, 2025 sanitary survey conducted by the New Mexico Environment Department – Water Protection Compliance & Enforcement Bureau (NMED WPCEB) have now been addressed and returned to compliance, with the exception of items related to Well #2, which will be resolved upon completion of its scheduled rehabilitation project. The remaining items related to Well #2 are already scheduled for completion.

#### What happened?

Earlier this year, our water system was cited for failing to complete the required administrative corrections from the 2025 sanitary survey within the established timeframe. This was not a water quality issue and not a drinking-water safety issue. The violation was strictly a compliance/administrative matter based on missed deadlines, not a failure of treatment or water quality.

#### What does this mean for you?

The January notice was not indicative of a risk to public health.

- The water was safe to drink and use throughout the compliance efforts.
- Drinking water testing has consistently shown no contaminants of concern and no health-related violations.
- No action is required on your part. You do not need to boil your water or take any precautions.

If you have specific health concerns, you may wish to consult your healthcare provider. General information about reducing risks from microbes is available from the EPA's Safe Drinking Water Hotline at 1-800-426-4791.

**What is being done?**

The City continues to work closely with NMED to finalize the remaining corrective items associated with Well #2. Once construction and rehabilitation work are finished, the system will be fully compliant on all items from the 2025 sanitary survey.
