<b>***Renewals</b> – The Town of Twisp Building Department will allow a permit to stay active for <b>18 months</b> after issuance. If the project cannot be finished in 18 months the applicant must apply in writing for a six-month extension for a fee of \$100, if the project is still not complete within that six-month extension the applicant must renew the permit by applying in writing for a one-year extension and ½ the original permit fee will be due, after those initial extensions have expired the permit will expire and a new permit will be required. This will give the applicant three years to complete the project. If the project cannot be completed within three years, a new completed permit application and fees must be submitted. Expired permits that have had all inspections completed up to the FINAL inspection may request a Final Inspection for \$100.00 Special Inspection Fee <b>per</b> inspection conducted.

## BUILDING VALUATION DATA

At the request of numerous building officials, *Building Standards™* offers the following building valuation data representing average costs for most buildings. Because residential buildings are the most common for many cities, two general classes are considered for these, one for "average" construction and the other for "good." Adjustments should be made for special architectural or structural features and the location of the project. Higher or lower unit costs may often result.

The unit costs are intended to comply with the definition of "valuation" in Section 223 of the 1997 *Uniform Building Code™* and thus include architectural, structural, electrical, plumbing and mechanical work, except as specifically listed below. The unit costs also include the contractor's profit, which should not be omitted.

The determination of plan check fees for projects reviewed by the International Conference of Building Officials will be based on valuation computed from these figures, which were established in April 2002.

### REGIONAL MODIFIERS

The following modifiers are recommended for use in conjunction with the building valuation data. Additionally, certain local conditions may require further modifications. To use these modifiers, merely multiply the listed cost per square foot by the appropriate regional modifier. For example, to adjust the cost of a Type III One-hour hotel building of average construction for the Iowa area, select Regional Modifier 0.80 and unit cost from valuation data, \$87.50:

$$0.80 \times 87.50 = \$70.00 (\text{adjusted cost per square foot})$$
