

Two Harbors Public Utilities

Residential Home Energy Audit Program

Program Description

Two Harbors Public Utilities wants to work with you to help reduce your energy use and assist you in becoming more energy efficient. We are now offering subsidized Home Energy Audits to our residential customers. Our partner, Frontier Energy, enlists professional, knowledgeable auditors who can provide a comprehensive plan to save energy (and money) that is customized for your home. If you want to save money on your energy bills, enjoy a cozier, weatherized home, or just want to help reduce energy waste, sign up for a Home Energy Audit today. Select the audit that makes sense for you. We'll help you find your savings opportunities.

Home Walkthrough - \$25

- Perform a basic analysis of your utility bills.
- Discuss any specific concerns.
- Conduct a comprehensive whole house inspection.
- Analyze insulation levels throughout the home
- Examine the age, efficiency and general condition of your mechanical systems.
- Identify and discuss energy efficiency opportunities.
- Report emailed to you with the recommendations discussed on site.

Home Walkthrough with Blower Door Test and Infrared Scan - \$50

If your primary heat sources is electricity, then you will also be eligible for a blower door test and walkthrough with an infrared camera. This will allow for:

- A better idea of what is happening behind your drywall and areas that can't be seen.
- A view of temperature differences to see where insulation is present, missing or ineffective.
- Development of more customized solutions to address air leaks, ice dams and overall conditioned air loss.
- Any notable findings from each analysis will be included in the audit report that gets emailed to you.

Direct Install Options (Dependent Upon Heating Source)

While on site, the auditor will install up to three LED screw-in bulbs at the location of your choice. If you have an electric water heater, the direct install may also include up to two high efficiency showerheads, two faucet aerators, and assess/make an adjustment to the water heater set point temperature. If your primary heat source is electricity, the direct install may also include new foam weather stripping around 1 exterior door and electrical outlet insulation gaskets for exterior wall outlets and switches.

Sign me up for a Home Energy Audit

(Please allow up to two weeks to schedule your audit)
