

## Edna G Commission Meeting

2/19/20

Bubblers are working well. We could order two more to get full coverage around the tug.

Mooring Lines-still working on contacting the Coast Guard about getting rid of the long lines that go to the dolphin. We need to contact the Coast Guard about what we need to have used for it being moored, because it is classified as a dead ship. We need to replace one steel line, we need to contact Lyft Pro. Miles will call them. Miles reported on the Council Priority list. The tug was still on the list. Hayes presented on the Northern Bedrock Conservation Corp option to complete some small projects.

### **Repair Projects**

- Windows on the pilot house
- Whistle Repair
- Captains Quarters
  - Ceiling repair
  - Soft spots in the floor.
- Asbestosis abatement in the coal/engine room
- Roof on the pilot house needs to be sealed properly.
- Capstan decking is rotted
- Soft spots in the galley floor
- Crew quarters-everything
- Port holes in the galley need to be water proofed.
- Whistle Project

Kathy researched pieces that Tom emailed her.

Hayes will call JAMAR about getting a price to get the whistle working.

The whistle has three air tanks and many valves that need to be replaced.

2021 is Edna's 125<sup>th</sup> birthday. Need to do something.
