Ulland Brothers has installed the temporary water systems on 5th and 6th Avenues. The crew is working on connecting residences to temporary water service and will begin removing surface improvements once this is complete.

Surface improvements will be removed starting Monday and utility construction will follow. During this phase residents should expect that there will be disturbance to access. Beginning Monday 5/23 residents who do not have alley access to their property should seek alternative parking for vehicles. 8th Street south of 5th Avenue may be used for parking during this time. When possible the contractor will make driveways accessible but this will be very limited during utility construction.

Residents on 5th Avenue that will be connected to the temporary water system should note that since the lines are on top of the ground, tap water will be warmer than normal especially in sunny conditions. If cold water is desired for consumption it is best to refrigerate the desired amount. The temporary water lines should remain undisturbed by non-construction personnel. Moving lines for the purpose of mowing or other activities can cause stresses in the line and may cause them to rupture.

Expect an increase in construction traffic as excavation resumes on 5th Avenue. Please be aware of your surroundings while traveling within active construction areas. Keep a safe distance and use your best judgement. Safety is the number one priority. If you have any questions reach out to myself or one of the contacts listed on the project website.

Thank you,
