Sanitary sewer installation is in progress on 5th Avenue and will be nearing completion by the end of the week. Services to homes on 5th Avenue are being reconstructed in conjunction with the installation of the main. Once this work is complete the contractor will begin installing water services prior to rebuilding the road base.

Ulland is targeting mid to end of next week to begin grading the roadway on 5th Avenue. Access on 5th Avenue will continue to be limited and alternative parking should be used. Continue to use the alleys as an alternative means of access. Trucks are hauling material via alleys as well and additional caution should be taken during active construction.

A reminder to those residents on the temporary water system, since the lines are on top of the ground tap water will be warmer than normal especially in sunny conditions. If cold water is desired for consumption it is best to refrigerate the desired amount. The temporary water lines should remain undisturbed by non-construction personnel. Moving lines for the purpose of mowing or other activities can cause stresses in the line and may cause them to rupture.

During reconstruction of 5th and 6th Avenues there will be no interruption to garbage or recycle services. If your service provider normally picks up on the street side of your residence please refer to the contact below and we will make alternative arrangements.

As always, be aware of your surroundings while traveling within active construction areas. Keep a safe distance and use your best judgement. Safety is the number one priority. If you have any questions reach out to myself or one of the contacts listed on the project website.

Thank you,
