Concrete curb is complete and the crews have moved on to grading and sidewalk placement. 8th Street sidewalk is underway and sidewalk on 4th Avenue is scheduled to be poured as soon as 8th Street is finished.

Following completion of sidewalk and grading operations the turf restoration crew will begin placing topsoil for seeding. This work is scheduled for next week and will be dependent upon paving operations. Ulland Brothers plans to pave early next week. After pavement is placed and compacted please wait to drive on it for at least 4 hours and refrain from overturning your wheels while stationary. This will result in damage to the new pavement.

Concrete work will continue into next week until it is complete. As a reminder, please do not walk on new concrete for 24 hours or drive on new concrete for 7 days. This will allow for proper curing of the concrete and we appreciate your cooperation. There will be increased construction traffic for both concrete and paving operations and it should be taken into consideration while traveling within the active construction zone.

Remember, be aware of your surroundings. Keep a safe distance and use your best judgement. Safety is the number one priority. If you have any questions reach out to myself or one of the contacts listed on the project website.

Thank you,
