

Edna G Tug Commission Meeting
May 15, 2019
City Council Chambers

Members Presents: Tom Koehler, Kathy Glenn, Carl Schaffer, Hayes Scriven

Members Absent: Miles Woodruff, Mike Ojard

Guest: Mayor Christopher Swanson

Tom talked with electrician, Steve Detlefsen about the ground fault issue on the tug. It will be June before he can look at it to see what is wrong.

Tom talked about the issue with the slow cookers that were being used on the tug. The new outlets that were installed were not working. Tom will investigate further.

Tom pumped out 12-14 inches of water from the bilge on the day of the cleaning day.

We need to do something with the steel mooring line on the aft of the tug.

Tom brought the tug close to the bumpers so we could see if the cable we have would work. It did not.

Tom talked about an option that we could try by leaving one end of the cable open.

Tom will practice on a steel cable that he can get from the City.

Kathy asked if we want to put the compass back. Not at this moment.

Kathy reported on the cleaning day. Got most of the space clean. Did not mop or clean the decks. Captain's Quarters did not get cleaned.

We can try to caulk the front portholes in the near future.

Kathy praised the public works team for the help with cleaning day.

Kathy reported that there was six people that helped with the cleaning.

Tom reported that he has a box with Edna G artifacts and memorabilia at his house.

Carl talked about the need for centralized storage material tug materials.

There is potential storage at City Hall.

Carl will call Patty about the potential storage.

Carl read through the ordinance that created the Edna G commission. He stated that we do not have a charter/mission for the commission.

Carl reviewed what is stated in the ordinance for the duties of the Commission. There is no specific duties for the Tug commission.

The only duties listed are in the ordinance for the hotel motel tax, but not in the official city ordinance that governs the commission.

Carl is recommending a charter that would define mission/authority for the commission. It would create a charge for the commission

We discussed a potential larger issue with all the City Commission not having charges. What is the next step?

Engineering Study

There is no update on the engineering study. **We are requesting and update on the study.**

Respectfully Submitted,

Hayes Scriven
