2. In any residential zone, no front yard shall be required to exceed the average depth of existing front yards on the same side of the street within the same block, when fifty-one percent (51%) or more of lots within that block are improved with residential buildings; provided that in no case shall a front yard depth be less than twelve (12) feet.

SECTION 9.14 CONDITIONAL USES:

- A. DETERMINATION: Subject to the requirements of Section 18.7, the board of adjustments may authorize a conditional use to be located within any zone in which such conditional use is permitted, if the evidence presented by the applicant clearly shows:

1. That the proposed use at the particular location is necessary or desirable to provide a service or facility which will contribute to the general well being of the neighborhood or the community; and
2. That such use will not be detrimental to the health, safety, or general welfare of persons residing or working in the vicinity, or injurious to property or improvements in the vicinity.

B. **CONDITIONAL USE PERMITS:** In accordance with K.R.S. 100.237, the board of adjustments shall have the power to hear and decide applications for conditional use permits to allow the proper integration into the community of uses which are specifically named herein which may be suitable only in specific locations in the zone and only if certain conditions are met:

1. The board of adjustments may approve, modify, or deny any application for a conditional use permit. If it approves such permit, it may attach necessary conditions such as time limitations, requirements that one or more things be done before the request can be granted, or conditions of a continuing nature. Any such conditions shall be recorded in the board's minutes and on the conditional use permit, along with a reference to the specific section in the zoning regulation listing the conditional use under consideration. In addition, said conditional use permit shall be recorded in the office of the county clerk and one copy of said permit attached to the deed for the property for which it is issued. The board shall have power to revoke conditional use permits, or variance for noncompliance with the condition thereof. Furthermore, the board shall have a right of action to compel offending structures or uses removed at the cost of the violator and may have judgment in persona for such cost.
2. Granting of a conditional use permit does not exempt the applicant from complying with all of the requirements of this ordinance, the building code, housing code, and other regulations of the city.
3. In any case where a conditional use permit has not been exercised within the time limit set by the board or within twelve (12) consecutive calendar months from date of issuance, such conditional use permit shall not revert to its original designation unless there has been a public hearing. When construction is not a part of the use, exercised shall mean that the use is in operation in compliance with the conditions as set forth in the permit.
4. The Zoning Administrator shall review all conditional use permits, except those for which all conditions have been permanently satisfied, at least once annually and shall have the power to inspect the land or structure where the conditional use is located in order to ascertain that the landowner is complying with all of the conditions which are listed on the conditional use permits.

If the landowner is not complying with all of the conditions listed on the conditional use permit, the zoning administrator shall report the fact in writing to the chairman of the board of adjustments and to the legislative body. The report shall state specifically the manner in which the landowner is not complying with the conditions on the conditional

use permit, and a copy of the report shall be furnished to the landowner at the same time it is furnished to the chairman of the board of adjustments.

The board shall hold a hearing on the report within a reasonable time, and notice of the time and place of the hearing shall be furnished to the landowner at least two weeks prior to the hearing. If the board of adjustments finds that the facts alleged in the report of the zoning administrator are true and that the landowner has taken no steps to comply within the time between the date of the report and the date of the hearing, the board of adjustments may authorize and direct the zoning administrator to revoke the conditional use permit and take the necessary legal action to cause the termination of the activity on the land which the conditional use permit authorizes.

5. Once the board of adjustments has completed a conditional use permit and all the conditions required are of such type that they can be completely and permanently satisfied, the zoning administrator, upon request of the applicant, may, if the facts warrant, make a determination that the conditions have been satisfied, and enter the facts which indicate that the conditions have been satisfied and the conclusion in the margin of the copy of the conditional use permit which is on file with the county clerk, as required in KRS 100.344. Thereafter said use, if it continues to meet the other requirements of this ordinance will be treated as a permitted use.

Article 10, Section PUD, Paragraph E, Subparagraphs 4, 6, and 8 Amended by Ordinance 2011-23.

SECTION III Planned Unit Development Criteria

Development Plan proposals in a Planned Unit Development shall be primarily evaluated against the criteria listed below. The Concept Development Plan shall fulfill the following criteria unless a portion of the criteria do not apply or relate, in whole or part, to a specific proposal. The examples listed in this section are for illustrative purposes. Specific solutions used to fulfill these criteria are contingent upon the size, scale, site conditions, design, uses and impacts of a proposed development.

1. Mixed Use Development and Pedestrian Orientation: Planned Unit Developments shall generally have a mixed use orientation (combination of differing types of residential, commercial, and/or industrial uses) both within the development itself and relative to the relationship between the proposed planned development and adjacent sites. The additional intensity allowed in a Planned Unit Development shall only be permitted when a true mixed use and/or an amenity – oriented development with community and recreation facilities as described in this standard is provided.

In general, planned developments shall have a pedestrian/customer orientation, where it is possible to live, work, shop, and play in the same immediate vicinity without a required dependence on the automobile. This may be accomplished through the use of comprehensive pedestrian circulation networks including multipurpose paths and walks along main routes and open spaces such as stream corridors, between major destinations within the development and adjoining areas, secondary walk connections to the multipurpose paths, the creation of a designed pedestrian environment including street trees in addition to other required landscaping, decorative street lights and other street furniture, and seating areas, and the use of integral curb walks where appropriate along streets. Disruptions in major paths due to street and drive intersections shall be minimal. Additionally, in commercial areas, pedestrian orientation can be accomplished by placing buildings in close proximity to the street with parking areas to the side and rear of buildings, mixing uses within the same multi-story buildings, building entrances directly facing streets with reduced setbacks, architectural design which employs display windows, projecting signs, and awnings at street level, and designed outdoor seating and gathering spaces at the street level. Each development proposal must demonstrate in detail how the project will be made walkable throughout.

2. Compatibility of Uses: Measures shall be taken to assure compatibility of land uses within a planned development itself and adjacent sites. Such measures may include the provisions of buffer zones, common open space areas and landscape features, transitional

Planned Unit Development Continued

land uses, or a mixed-use development in which no specific type of land use is dominate. When applicable, the design methods recommended in the “Development Layout, Lot Sizes, and Setbacks” section of the Comprehensive Plan’s Land Use Element shall be employed. Compatibility measures/mitigation measures shall exceed the usual minimum standards of this order when needed to address impacts of the proposed development.

3. Open Space: Useable open space(s), in an amount over and above setback and buffer yard areas and open areas required by the underlying zone, shall be provided. These spaces may be provided in the form of greenways, parks, plazas, arcades, commons, trails, sports courts or other athletic and recreational areas, outdoor areas for the display of sculptural elements, etc. Land reservations for community facilities may be considered in lieu of useable open space. The use of single loaded streets to provide greenways with multi-purpose paths, park areas, or to protect stream corridors, may be proposed for this purpose. Open Space areas are encouraged to have street frontage and visibility. Any site proposed to be publically dedicated or donated for park or open space purposes shall comply with the appropriate legislative body’s requirements for acceptance of such dedications or donations.
4. Multi-Modal Transportation System: Planned developments shall incorporate multi-modal transportation elements through the development, depending on the foreseeable needs of future residents and users of the site, and the relationship of the project site to the community at large. Such multi-modal elements may include provisions for mass transit stops or stations, car pooling lots, pedestrian and bicycle paths and lanes, bicycle parking areas, etc. Multi-modal facilities are encouraged to be combined with the pedestrian systems and open spaces described in Sections 1 and 3.
5. Preservation of Existing Site Features: Existing topography, significant tree cover, tree lines along property lines, cemeteries, and water courses and water bodies shall be largely preserved and incorporated into the project design, where appropriate and consistent with the remainder of this article. The retention of such features may also fulfill portions of the requirements in Section 3 “Open Space” and Section 6 “Landscaping.”
6. Landscaping: Substantial landscaping shall be provided in a planned development with emphasis given to street scape areas, buffer zones, and the provision of significant landscaping (in terms of size of landscape areas, and quantity and quality of landscape materials) within the developed portions of the site. The use of landscape design guidelines is required for multi-phased projects. The retention of existing healthy, substantial trees should occur wherever possible. Properly designed street tree plantings may be permitted to fulfill some landscaping requirements as part of an overall amenity package.
7. Architecture: Sites which are subject to architectural requirements through adopted overlay districts or land use studies shall follow said requirements. For all other sites, a consistent architectural theme shall be provided in planned developments. The theme shall largely use traditional, regionally influenced architectural forms and elements and shall allow variations within it. Traditional styles such as Georgian, Federal, I-House, Cape Cod, Craftsman, Tudor, Queen Anne, Italianate, early 20th century commercial structures, and local farm structures may be used as models. The architectural theme shall

Planned Unit Development Continued

also relate to existing structures on the project site and adjacent sites, especially if such existing structures are historic.

For attached or multi-family residential developments and commercial or office developments, the predominant building materials shall have a solid appearance, such as could be achieved with brick, stone, and architectural grade cast concrete products designed to replicate natural materials. Roof designs shall have a finished appearance through the use of three dimensional pitched roof forms with architectural grade roofing and/or the use of defined parapets with cornice lines. Long building facades and roof planes shall be interrupted through the use of three dimensional jogs in the building footprint and secondary roof forms such as hips, dormers, and gables. Such buildings shall include architectural detailing for cosmetic enhancement, largely use natural colors, and use a consistent design treatment on all facades. The use of architectural guidelines or building prototypes is required for all multi-phased projects.

Developments should be mixed-use in character with multi-level buildings where commercial services are proposed. Walkability must be planned for when locating commercial and residential uses in proximity to each other. Office and residential uses are strongly advocated above commercial uses in business districts and decrease dependence on the automobile.

8. Historic and Prehistoric Features: Historic and prehistoric features on the project site shall be retained, utilized, and incorporated into the overall project design if physically and economically feasible.
9. Signage: A consistent signage theme shall be provided within a planned development. Building mounted signs shall be the predominate signage on the project site. Signage shall visually correlate to the planned architectural theme by the use of consistent design details, materials, and colors. The use of signage design guidelines is required for multi-phased projects and regulated by Article XIV.
10. Transportation Connections and Entry Points: The provision of transportation connections (street connections, pedestrian paths, multi-purpose trails, sidewalks, and bicycle facilities) shall be provided in all planned development unless physically unfeasible or unsafe. This shall include connections to adjoining properties and developments, and inter-connectivity within the development itself, and contain minimal use of cul-de-sacs or other dead-end types of streets only when necessary. Transportation connections shall account for the County's adopted Transportation Plan and any adopted greenway, trails, bikeway, and/or pedestrian plans. In addition, the various entry points (streets, paths, etc.) into a planned development shall be marked or otherwise defined through the use of landscaping, low-key signage on retaining walls, architectural or sculptural elements, archways, markers, etc. Any structures used to demarcate entry points shall visually correlate to the planned architectural theme by the use of consistent design details, materials, and colors.
11. Conformance with Comprehensive Plan: All planned developments shall conform to the

Planned Unit Development Continued

provisions of the adopted Comprehensive Plan and take into account the limitations of existing or planned infrastructure.

NOTE: Article 10, Section PUD, Section III, Amended by Ordinance 2011-23.

OFF-STREET LOADING AND/OR UNLOADING REGULATIONS

For all buildings and structures erected, altered, or extended, and all uses of land established as specified herein, after the effective date of this ordinance, off-street loading and/or unloading facilities shall be provided as required by the regulations herein. However, where a building permit has been issued prior to the date of the adoption of this ordinance, and provided that construction has not begun within ninety (90) days of such effective date, off-street loading and/or unloading facilities in the amounts required by this ordinance, shall prevail.

SECTION 12.0 GENERAL REQUIREMENTS—

A. Spaces Required-

1. Every building or part thereof, erected and occupied for uses permitted in commercial and industrial zones, including “conditional uses” permitted in residential zones, involving the receipt or distribution of vehicles, materials, or merchandise and having up to 5,000 square feet of gross floor area shall be provided with at least one loading and/or unloading space. A study shall be prepared by the company or operator to determine the additional loading and/or unloading space needs over and above the first space required for the specific use proposed. In determining the number of spaces needed, the study shall take into consideration the following:
 - a. estimated and projected arrival and departure rates for scheduled and unscheduled (random) trucks;
 - b. estimated and projected length of truck stop duration for loading and/or unloading of each truck;
 - c. Estimated number of trips by vehicle type (i.e., two axle vehicles, semi-tractor trailers, etc.) and size

The zoning administrator shall review the study of estimated and projected loading and/or unloading needs and make a determination if the number of spaces provided are adequate for the use proposed.

2. If it is determined by the zoning administrator, based on existing conditions of the proposed site, the design of the building, and the completed needs study, that additional loading and/or unloading spaces are needed to accommodate the facilities than could be reasonably provided, the zoning administrator shall require that additional parking areas, properly designed, to handle the parking of necessary trucks including the maneuvering of the trucks to and from the space, be provided for the storage of trucks waiting to be loading and/or unloading.
3. If after approval by the zoning administrator of the number of spaces and any storage of truck parking needed to accommodate the loading and/or unloading of trucks for a specific use, a need exists, based on operation of the specific use, to provide additional

Article XII Continued

off-street loading and/or unloading spaces or storage of trucks than was previously determined, the zoning administrator may require that corrective action be taken to eliminate any deficiencies as follows:

- a. limit the time and interval of arrival and departure of trucks, commensurate with the need; or
 - b. require necessary additional loading and/or unloading spaces, or require that adequate parking areas are provided for the storage of trucks waiting to be loaded and/or unloaded.
- B. Additional Loading and/or Unloading Spaces to be provided – Whenever the intensity of any use of a building or premises is increased through addition of gross floor area, change of use or increased activity, additional loading and/or unloading spaces shall be provided in accordance with the requirements of Section 12.0, A, above, if it is determined by the zoning administrator that the existing spaces are not adequate to serve such increase in intensity.
- C. Location of Off-street Loading and/or Unloading Area – All loading and/or unloading Spaces shall be located on the same lot as the use served. However, permitted uses located in industrial zones may provide parking areas for the storage of trucks waiting to be loaded and/or unloaded within three hundred (300) feet from each lot served, upon the approval of the zoning administrator, providing that said off-street storage of trucks are unable to be provided on the same lot or contiguous to the same lot as the use being served and further provided that said storage of trucks are located in the same zone as the use being served. Loading and/or unloading areas may be located in the side and minimum required rear yards, provided that all loading and/or unloading facilities shall be set back a minimum of ten (10) feet from the rear lot line and minimum side yard clearance are maintained.
- D. Driveways not Computed as Part of Required Loading and/or Unloading Area – Entrances, exits, or driveways shall not be computed as any part of a required loading and/or unloading space.

If any existing use or building or other structure is extended, enlarged, or reconstructed, the performance standards for the district involved shall apply with respect to such extended, enlarged, or reconstructed portion or portions of such use or building or other structure.

SECTION 15.1 TIME SCHEDULE FOR COMPLIANCE OF PERFORMANCE STANDARDS: Except for standards regulated and enforced by the State of Kentucky, compliance with the provisions of this article of the ordinance shall be according to the following time schedule:

- A. All new installations shall comply as of going into operation.
- B. All existing installations not in compliance as of the effective date of the ordinance shall be in compliance within one (1) calendar year of the effective date of this ordinance unless the owner or person responsible for the operation of the installation shall have submitted to the zoning administrator a program and schedule for achieving compliance, such program and schedule to contain a date on or before which full compliance will be attained and such other information as the zoning administrator may require. If approved by the zoning administrator, such date will be the date on which the person shall comply.

The zoning administrator may require persons submitting such program to submit subsequent periodic reports on progress in achieving compliance.

SECTION 15.2 PERFORMANCE STANDARDS:

- A. **BUILDING ENCLOSURES:** In the I-1 and I-2 industrial districts, permitted uses shall be operated either within a completely enclosed building or within an area screened from view at the nearest district boundary, according to Section 9.17 and Article XIV of this ordinance.
- B. **LANDSCAPING:** In all industrial districts, all required yards shall either be open landscaped and grassed areas or be left in a natural state, if acceptable to the legislative body. If said area is to be landscaped, it shall be landscaped attractively with lawn, trees, shrubs, etc., according to the initially submitted plans which were first approved of for the development of such tract as a permitted use.

Article XV Continued

In areas to be used for off-street parking, the parking arrangement and surfacing must likewise have been approved of for the development of such tract as a permitted use. Any landscaped areas shall be properly maintained thereafter in a sightly and well kept condition. Parking areas shall likewise be maintained in good condition. Any areas left in a natural state shall be properly maintained in a well kept condition.

- C. NOISE: For the purpose of measuring the intensity and frequencies of a sound, a sound level meter and an octave band analyzer shall be employed that conforms to specifications published by the American National Standards Institute (specifications for Sound Level Meters S1.4 – 1971, and Specifications for Octave, Half Octave and Third Octave Band Filter Sets S1.11 – 1966, American National Standards Institute, 1430 Broadway, New York, New York 10018, or the latest edition of such standards, shall be used). In the enforcement of the regulation, noises produced by the operation of motor vehicles or other transportation facilities shall not be included in determining the maximum permitted decibel level.

In the I-1 district the sound pressure of noise radiated from any activity shall not exceed the values given in Table 3 of this section in any octave band frequency at any point on or beyond any lot line. If the I-1 district adjoins a residential district, the maximum sound pressure level at any point on the district boundary shall be reduced by six decibels from the maximum listed in Table 3.

In the I-2 district, the sound pressure of noise radiated from any activity shall not exceed the value given in Table 3 of this section in any octave band frequency at any point on or beyond the nearest district boundary. If said district adjoins a residential district, the maximum sound pressure shall be reduced by six (6) decibels from the maximum listed in Table 3 of this section.

In all districts, industrial noise shall be muffled so as not to become objectionable due to intermittence, beat, frequency, or shrillness.

- D. ODOROUS MATTER: No emission of odorous matter shall be allowed in excess of ambient air quality standards as set forth by regulations adopted by the Kentucky Department for Natural Resources and Environmental Protection, Division of Air Pollution, Cincinnati Air Quality Region.
- E. Humidity, Heat or Glare: In the I-1 districts, any activity producing humidity, in the form of steam or moist air or producing heat or glare, shall be carried on in such a manner that the steam, humidity, heat or glare is not perceptible at any lot line. In the I-2 district, any activity producing heat or glare shall be carried on in such a manner that the steam, humidity, heat or glare is not perceptible at or beyond any residential or commercial district boundary. Detailed plans for the elimination of humidity, heat or glare may be required before the issuance of a building permit.

In such case, the proceedings shall not be stayed other than by a court of record on application, or on notice to the zoning administrator from whom the appeal is taken and on due cause shown.

SECTION 18.5 POWERS OF BOARD OF ADJUSTMENT: Upon appeals, the board of adjustment shall have the following powers:

- A. To hear and decide on applications for dimensional variances where, by reason of the exceptional narrowness, shallowness, or unusual shape of a site on the effective date of this ordinance, or by reason of exceptional topographic conditions, or some other extraordinary situation or condition of that site, the literal enforcement of the dimensional requirements (height or width of building or size of yards, but not population density) of the zoning ordinance would deprive the applicant of reasonable capacity to make use of the land.
- B. To hear and decide appeals where it is alleged, by the appellant, that there is an error in any order, requirement, decision, grant, or refusal made by a zoning administrator in the enforcement of this ordinance. Such appeal shall be taken within a sixty (60) consecutive calendar days.
- C. To hear and decide applications for conditional use permits to allow the proper integration into the community of uses which are specifically named herein, which may be suitable only in specific locations in the zone only if certain conditions are met as specified in Section 9.14 of this ordinance.

Article XVIII Continued

- D. To hear and decide, in accordance with the provisions of this ordinance, requests for interpretation of the official zoning map or for decisions upon other special questions upon which said board is authorized to act upon.
- E. To hear and decide, in accordance with the provisions of this ordinance and the adopted comprehensive plan, requests for the change from one nonconforming use to another.

SECTION 18.6 DEMENSIONAL VARIANCES; CHANGE FORM ONE
NONCONFORMING USE TO ANOTHER; CONDITIONS GOVERNING APPLICATIONS;
PROCEDURES

- A. DIMENSIONAL VARIANCES: Before any dimensional variance is granted, the board of adjustment must find all of the following, which shall be recorded along with any imposed conditions or restrictions in its minutes and records and issued in written form to the applicant to constitute proof of the dimensional variance. Such dimensional variance shall not be granted by the board of adjustment unless and until:
 - 1. A written application for a dimensional variance (including the required fee as per Section 19.0 of this ordinance) and a site plan, subject to the application requirements of Section 9.19, are submitted demonstrating:
 - a. That specific conditions and circumstances exist which are unique to the applicant's land and do not exist on other land in the same zone;
 - b. That the manner in which the strict application of the provisions of this ordinance would deprive the applicant of a reasonable use of the land in the manner equivalent to the use permitted other land owners in the same zone;
 - c. That the unique conditions and circumstances are not the result of actions of the applicant taken subsequently to the adoption of this ordinance;
 - d. Reasons that the dimensional variance will preserve, not harm, the public safety and welfare, and will not alter the essential character of the neighborhood; and
 - e. That granting the dimensional variance requested will not confer on the applicant any special privilege that is not conferred by this ordinance to other lands, structures or buildings in the same zone. No nonconforming use of neighboring lands and structures in the same zone shall be considered grounds for the issuance of a dimensional variance.

Article XVIII Continued

2. Notice of public hearing shall be given in accordance with Section 18.2 of this ordinance.
3. The public hearing shall be held. Any person may appear in person, or by agent, or by attorney.
4. Prior to granting a dimensional variance:
 - a. The Board of adjustment shall make findings that the requirements of this section have been met by the applicant for a dimensional variance.
 - b. The board of adjustment shall further make a finding that reasons set forth in the application justify the granting of a dimensional variance and that the dimensional variance is the minimum variance that will make possible the reasonable use of the land, building, or structure, and under no circumstances shall the board of adjustment:
 1. Grant a dimensional variance which would vary by more than fifty (50) percent of the applicable regulation when the development is occurring in newly platted areas; and
 2. Grant a dimensional variance which would vary by more than fifty (50) percent of the average height, yard, and setback of existing surrounding development when the proposed construction occurs on lots or parcels of land already platted and where more than fifty-one (1) percent of said lots or parcels of land are improved with structures. If less than fifty-one (51) percent of the surrounding lots or parcels of land are improved with structures, then said development shall be governed by the requirements of Section 18.6.
 - c. The board of adjustment shall further make a finding that the granting of the dimensional variance will be in harmony with the general purpose and intent of this ordinance as well as the adopted comprehensive plan, and will not be injurious to the neighborhood, or otherwise, detrimental to the public welfare.
5. In granting any dimensional variance, the board of adjustment may prescribe appropriate conditions and safeguards in conformity with this ordinance. Violation of such conditions and safeguards, when made a part of the terms under which the dimensional variance is granted, shall be deemed a violation of this ordinance and punishable under Section 16.9 of this ordinance.

Article XVIII Continued

- B. **DIMENSIONAL VARIANCE CANNOT CONTRADICT ZONING REGULATION:** The board of adjustment shall not possess the power to grant a dimensional variance to permit a use of any land, building, or structure which is not permitted by this ordinance in the zone in question, or to alter the density of dwelling unit requirements in the zone in question.
- C. **DIMENSIONAL VARIANCE RUNS WITH LAND:** A dimensional variance applies to the property for which it is granted and not to the individuals who applied for it. A dimensional variance also runs with the land and is transferable to any future owner of land, but it cannot be transferred by the applicant to a different site.
- D. **CHANGE FROM ONE NONCONFORMING USE TO ANOTHER:** A nonconforming use shall not be changed to another nonconforming use without the specific approval of the board of adjustment, as provided herein.
1. The board of adjustment shall have the power to hear and decide on applications to convert or change an existing nonconforming use to another nonconforming use, subject to the following:
 - a. A written application for a change from one nonconforming use to another (including the required fee as per Section 19.0 of this ordinance) and a site plan, if applicable, subject to the applicable requirements of Section 9.19, shall be submitted to the board;
 - b. Notice of public hearing shall be given in accordance with Section 18.2 of this ordinance;
 - c. The public hearing shall be held. Any person may appear in person, by agent, or by attorney;
 - d. Prior to granting a change from one nonconforming use to another, the board of adjustment shall find that the new nonconforming use is in the same or more restrictive classification of use as the prior nonconforming use. In the determination of the same or more restrictive classification of use, the applicant shall establish and the board of adjustment shall find:
 - (1) That the new nonconforming use shall generate less vehicular traffic (automobile and truck) than the prior nonconforming use;
 - (2) That the new nonconforming use is a nature which will emit less noise and air pollution than the prior nonconforming use;
 - (3) That the new nonconforming use will be more in character with the existing neighborhood than the prior nonconforming use, in that it is more in conformance with the adopted comprehensive plan, and

Article XVIII Continued

also, more in conformance with the uses permitted in the zone in which the use is located, than the prior nonconforming use.

- e. Any change of nonconforming use granted by the board of adjustment shall conform to the requirements of this ordinance, including, but not limited to: parking requirements, sign regulations and yard requirements, and all other pertinent ordinances of the legislative body.
- f. The board of adjustment shall not allow the enlargement or extension of a nonconforming use beyond the scope and area of its operation at which time its use became nonconforming.
- g. The board of adjustment, in granting a change of nonconforming uses, may attach such conditions thereto as it may deem necessary and proper; and the action, limitations and conditions imposed, if any, shall be in writing, directed to the applicant, with a copy to be furnished to the zoning administrator.
- h. The change of nonconforming use, as may be granted by the board of adjustment, applies to the property for which it is granted and not to the individual who applied and, therefore, cannot be transferred by the applicant to a different property.
- f. In the case where the change of nonconforming use has not occurred within one year after the date of granting thereof, the change of nonconforming use permit shall be null and void and reapplication to the board of adjustment shall have to be made.

SECTION 18.7 CONDITIONAL USE PERMITS: Conditional use permits shall not be issued without the specific approval of the board of adjustment, as provided herein.

- A. The board of adjustment shall have the power to hear and decide on applications for conditional use permits, subject to the following:
 - 1. A written application for a conditional use permit (including the required fee, as per Section 19.0 of this ordinance) and a site plan subject to the applicable requirements of Section 9.19, shall be submitted to the board;
 - 2. Notice of public hearing shall be given in accordance with Section 18.2 of this ordinance;
 - 3. The public hearing shall be held. Any person may appear in person, or by agency, or by attorney;

Article XVIII Continued

4. Prior to granting a conditional use permit, the board of adjustment shall find that the application for a conditional use permit meets the requirements of this ordinance and Section 9.14.

SECTION 18.8 DECISIONS OF THE BOARD OF ADJUSTMENT:

- A. In exercising the aforementioned powers, the board of adjustment may, so long as such action is in conformity with the provisions of this ordinance, reverse or affirm wholly or partly, or may modify the order, requirements, decision, or determination as made by the zoning administrator, from whom the appeal is taken.
- B. A simple majority of the total membership of the board of adjustment, as established by regulation or agreement, shall be necessary to reverse any order, requirement, decision or determination of the zoning administrator, so long as such action is in conformity with the provisions of this ordinance; or to decide in favor of the applicant on any matter upon which it is required to pass under this ordinance, or to affect any variation in the application of this ordinance.
- C. The details of the decision of the board shall be forwarded to the zoning administrator.
