Face Covering Protocol

CDC Resources

1. Wear a Mask to Protect Others
   - Wear a mask that covers your nose and mouth to help protect others in case you’re infected with COVID-19 but don’t have symptoms
   - Wear a mask in public settings when around people who don’t live in your household, especially when it may be difficult for you to stay six feet apart
   - Wear a mask correctly for maximum protection
   - Don’t put the mask around your neck or up on your forehead
   - Don’t touch the mask, and, if you do, wash your hands or use hand sanitizer to disinfect

2. Wear your Mask Correctly
   - Wash your hands or use hand sanitizer before putting on your mask
   - Put it over your nose and mouth and secure it under your chin
   - Try to fit it snugly against the sides of your face
   - Make sure you can breathe easily

3. Take Off Your Mask Carefully, When You’re Home
   - Untie the strings behind your head or stretch the ear loops
   - Handle only by the ear loops or ties
   - Fold outside corners together
   - Place mask in the washing machine daily
   - Be careful not to touch your eyes, nose, and mouth when removing and wash hands immediately after removing.
4. Follow Everyday Healthy Habits

- Stay at least 6 feet away from others
- Avoid contact with people who are sick
- Wash your hands often, with soap and water, for at least 20 seconds each time
- Use hand sanitizer if soap and water are not available
